## Hydrogen fuel — Product specification

*Carburant hydrogène — Spécification de produit*

Reference number  
ISO 14687:1999(E)

## Contents

1 Scope .....	1
2 Terms and definitions .....	1
3 Requirements .....	1
3.1 Classification.....	1
3.2 Applications .....	2
3.3 Limiting characteristics.....	2
4 Quality verification.....	2
4.1 Quality tests .....	2
4.2 Production qualification tests .....	2
4.2.1 General requirements.....	2
4.2.2 Analytical requirements of the production qualification tests.....	2
4.3 Lot acceptance tests .....	4
4.3.1 Applicability.....	4
4.3.2 Lot definitions .....	4
4.3.3 Number of samples per lot .....	4
5 Sampling.....	4
5.1 Sample size.....	4
5.2 Gaseous samples .....	4
5.3 Liquid samples (vapourized) .....	5
6 Test methods.....	5
6.1 Parameters of analysis .....	5
6.2 Hydrogen assay for purity .....	5
6.3 Hydrogen assay for <i>para</i> -hydrogen .....	6

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

This document was prepared by Technical Committee ISO/TC 197, *Hydrogen technologies*.
