Foreword .....	v
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Active magnetic bearing system architecture</b> .....	<b>2</b>
<b>5 Important differences between magnetic bearings and conventional bearings</b> .....	<b>3</b>
5.1 Some advantages of active magnetic bearings .....	3
5.2 Some disadvantages of active magnetic bearings .....	5
5.3 Comparison among rolling, fluid film and magnetic bearings .....	6
<b>6 System condition monitoring</b> .....	<b>6</b>
6.1 General .....	6
6.2 Excess rotor shaft displacement (radial $x$ , $y$ , and axial $z$ ) .....	6
6.3 Excess of rotor expansion .....	8
6.4 Overload of bearing (over current of bearing coil) .....	8
6.5 Bearing temperature high .....	8
6.6 Overspeed of rotor .....	8
6.7 Power supply defect .....	8
6.8 Battery power defect .....	8
6.9 Controller temperature high .....	8
6.10 Cooling .....	9
<b>7 Environmental factors</b> .....	<b>9</b>
7.1 Introduction .....	9
7.2 Environmental category tables .....	10
7.3 Explosive atmosphere types .....	13
<b>8 System requirements</b> .....	<b>13</b>
8.1 Estimation of bearing load .....	13
8.2 Limitation of $dl/dt$ for laminated bearings .....	14
8.3 Balancing .....	16
8.4 Location of bearings and transducers .....	17
8.5 Fault recovery and fault handling .....	17
8.6 Signal processing .....	17
8.7 Monitoring system .....	17
<b>9 Touchdown bearings</b> .....	<b>18</b>
9.1 Touchdown bearing requirements .....	18
9.2 Design of touchdown bearings .....	18
9.3 Touchdown bearing monitoring .....	20
9.4 Touchdown test methods .....	20
<b>10 Preventive inspection</b> .....	<b>22</b>
10.1 Introduction .....	22
10.2 Regular inspection and maintenance .....	22
10.3 Condition monitoring (recommendation) .....	22
10.4 Inspection checklist .....	23
<b>Annex A (informative) Sizing of magnetic bearings</b> .....	<b>24</b>
<b>Annex B (informative) Example of a design specification check list</b> .....	<b>27</b>
<b>Annex C (informative) Example conditions for acceptance tests</b> .....	<b>29</b>
<b>Annex D (informative) Touchdown test method example</b> .....	<b>30</b>
<b>Annex E (informative) Example of system limitations (current/voltage saturation)</b> .....	<b>32</b>
<b>Annex F (informative) Unbalance control</b> .....	<b>35</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 14839-4 was prepared by Technical Committee ISO/TC 108, *Mechanical vibration, shock and condition monitoring*, Subcommittee SC 2, *Measurement and evaluation of mechanical vibration and shock as applied to machines, vehicles and structures*.

ISO 14839 consists of the following parts, under the general title *Mechanical vibration — Vibration of rotating machinery equipped with active magnetic bearings*:

- Part 1: *Vocabulary*
- Part 2: *Evaluation of vibration*
- Part 3: *Evaluation of stability margin*
- Part 4: *Technical guidelines*
