Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Designation	2
4.1 Belting designation	2
4.2 Examples for ordering	3
5 Construction	4
6 Length	5
7 Width	5
8 Rubber cover	6
9 Tolerances on total belt thickness and cover thickness	7
9.1 Tolerance on total belt thickness	7
9.2 Tolerance on cover thickness	7
10 Transverse fabric joints in multi-ply belting	7
10.1 General	7
10.2 Outer plies	7
10.3 Inner plies	8
10.4 Adjacent plies and non-adjacent plies	8
10.5 Joints in the same ply	8
10.6 Mono-ply, duo-ply and solid woven belting	8
11 Longitudinal fabric joints in multi-ply belting and duo-ply belting	8
11.1 Spacing of joints	8
11.2 Number of joints	8
12 Longitudinal fabric or carcass joints in solid woven and mono-ply belting	8
13 Elongation	8
14 Full thickness tensile strength	8
15 Adhesion	9
16 Troughability	9
17 Sampling	10
18 Identification	10
Annex A (informative) Items to be agreed between the manufacturer and purchaser	11
Annex B (informative) Helpful information to be supplied by the purchaser	12
Annex C (informative) Lateral drift — Straight running	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 14890 was prepared by Technical Committee ISO/TC 41, *Pulleys and belts (including veebelts)*, Subcommittee SC 3, *Conveyor belts*.

This second edition cancels and replaces the first edition (ISO 14890:2003), of which it constitutes a minor revision. It also incorporates Technical Corrigendum ISO 14890:2003/Corr.1:2006.

Introduction

In the preparation of this International Standard, consideration has been given to the work of ISO Technical Committee ISO/TC41/SC3, and the following International Standards for conveyor belts have been followed as closely as possible:

- ISO 251;
- ISO 252;
- ISO 282;
- ISO 283;
- ISO 433;
- ISO 583;
- ISO 703.
