Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 14945 was prepared by Technical Committee ISO/TC 188, *Small craft*.

Introduction

The reason underlying the preparation of this International Standard is that the European Recreational Craft Directive (Directive 94/25/EC) makes it compulsory that all recreational craft within the scope of the directive shall be labelled with a builder's plate containing specified information. This applies to boats built inside the European Union (EU) as well as boats from other countries intended to be marketed in EU countries.

As the recreational craft market is operating worldwide, it seems to be advisable to create an International Standard thus making the requirements of the builder's plate known to manufacturers in countries inside and outside the EU to facilitate marketing their boats in EU countries without additional requirements as to labelling.
