6.10	Test No. 9 — Rigidity (longitudinal) (not applicable to platform containers).....	12
6.10.1	General.....	12
6.10.2	Procedure.....	12
6.10.3	Requirements.....	13
6.11	Test No. 10 — Lifting from fork-lift pockets (where provided).....	13
6.11.1	General.....	13
6.11.2	Procedure.....	13
6.11.3	Requirements.....	13
6.12	Test No. 11 — Weatherproofness (where appropriate).....	14
6.12.1	Procedure.....	14
6.12.2	Requirements.....	14
7	Testing of platform-based containers with incomplete superstructure in the folded condition (type codes P3 and P4 only) and of an interlocked pile of such containers.....	14
7.1	General.....	14
7.2	Test No. 12 — Stacking (type codes P3 and P4 only).....	14
7.2.1	General.....	14
7.2.2	Procedure.....	14
7.2.3	Requirements.....	15
7.3	Test No. 13 — Lifting of an interlocked pile by the top.....	15
7.3.1	General.....	15
7.3.2	Procedure.....	15
7.3.3	Requirements.....	15
7.4	Test No. 14 — Lifting of a flush folded container by the top.....	15
7.4.1	General.....	15
7.4.2	Procedure.....	16
7.4.3	Requirements.....	16
Annex A	(normative) Diagrammatic representation of capabilities of platform and platform-based containers.....	17
Annex B	(normative) Dimensions of fork-lift pockets (where provided).....	28
Annex C	(normative) Cargo-securing systems for platform and platform-based containers.....	30
Annex D	(informative) Dimensions of existing 1CC, 1C and 1CX platform-based containers (type codes P1 to P4) for the carriage of small multimodal containers.....	33
Bibliography	35

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 104, *Freight containers*, Subcommittee SC 2, *Specific purpose containers*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

This third edition cancels and replaces the second edition (ISO 1496-5:1991), which has been technically revised. It also incorporates the Amendments ISO 1496-5:1991/Amd 1:1993 and ISO 1496-5:1991/Amd 2:1994. The main changes compared to the previous edition are as follows:

- in [5.9.1](#), "1CC, 1C and 1CX" have been deleted;
- old subclauses 5.9.2, 5.9.3 and 6.12 have been deleted and new subclause [7.4](#) added;
- in [Table 3](#), the stacking test loads have been changed according to ISO 1496-1:2013;
- in [6.8.2](#), the floor strength test load has been changed from 5 460 kg to 7 260 kg;
- old Annexes B, D and E have been deleted;

A list of all parts in the ISO 1496 series can be found on the ISO website.
