## Contents

	Page
<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>2</b>
<b>4 General</b> .....	<b>2</b>
4.1 General conditions for testing.....	2
4.2 Test sequence.....	3
4.3 Test report.....	3
4.4 ISO 16750 conformance.....	3
<b>5 Tests</b> .....	<b>3</b>
5.1 Monitoring for impaired function.....	3
5.2 Cold and dry heat.....	4
5.2.1 Changes of temperature with specified rate of change.....	4
5.2.2 Temperature shock.....	5
5.3 Damp heat, steady-state.....	7
5.3.1 Test method.....	7
5.3.2 Test limits.....	7
5.4 Damp heat, cyclic.....	7
5.4.1 Test method.....	7
5.4.2 Test limits.....	9
5.5 Impact.....	9
5.5.1 Particle impact.....	9
5.5.2 Mechanical shock.....	9
5.6 Vibration.....	10
5.6.1 Random vibration test.....	10
5.6.2 Sinusoidal (resonance) test.....	11
5.7 Corrosive atmosphere.....	12
5.7.1 Test method.....	12
5.7.2 Test limits.....	12
5.8 Degrees of protection provided by enclosures (IP Code).....	12
5.8.1 Dust — Test method/test limits.....	12
5.8.2 Water spray — Test method/test limits.....	12
5.9 Air pressure (altitude).....	12
5.9.1 Test method.....	12
5.9.2 Test limits.....	13
5.10 Chemical brush or spray.....	13
5.10.1 Test method.....	13
5.10.2 Test limits.....	14
5.11 Solar radiation (ultraviolet).....	14
5.11.1 Test method.....	14
5.11.2 Test limits.....	14
5.12 Readability of display devices.....	14
5.12.1 Test method.....	14
5.12.2 Test limits.....	15
5.13 Electromagnetic compatibility.....	15
5.13.1 Susceptibility and emissions — Test method/limits.....	15
5.14 Electrical environment.....	15
5.14.1 Operating voltage.....	15
5.14.2 Over-voltage — Test method/limits.....	15
5.14.3 Reverse polarity — Test method/limits.....	15
5.14.4 Short circuit — Test method/limits.....	16
5.14.5 Battery-less operation — Test method/limits.....	16
5.14.6 Transient supply — Test method/limits.....	16

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 19, *Agricultural electronics*.

This second edition cancels and replaces the first edition (ISO 15003:2006), which has been technically revised.

The main changes compared to the previous edition are as follows:

- integration of editorial corrections;
- updates to the list of normative references and guidance on the application of the normative references;
- removal of the dates of the normative references;
- correction in the Bibliography.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
