Second edition
2023-02

Fibre-reinforced plastic composites — Determination of mode I interlaminar fracture toughness, G_{IC} , for unidirectionally reinforced materials

Composites plastiques renforcés de fibres — Détermination de la ténacité à la rupture interlaminaire en mode I, G_{IC} , de matériaux composites à matrice polymère renforcés de fibres unidirectionnelles

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Apparatus	6
5.1 Test machine.....	6
5.1.1 General.....	6
5.1.2 Speed of testing.....	7
5.1.3 Fixture.....	7
5.1.4 Load and displacement measurements.....	7
5.1.5 Recorder.....	7
5.2 Load blocks or piano hinges.....	7
5.3 Measuring apparatus.....	7
5.4 Travelling microscope (optional).....	7
5.5 Non-adhesive insert film.....	7
5.6 Ancillary equipment.....	8
6 Test specimen	8
6.1 Test plate preparation.....	8
6.2 Specimen preparation.....	8
6.2.1 Preferred specimens.....	8
6.2.2 Alternative specimens.....	9
6.3 Checking and measurement of the test specimens.....	9
6.4 Attachment of loading points.....	9
6.5 Measurement of delamination length.....	9
7 Number of specimens	9
8 Conditioning	10
9 Test procedure	10
9.1 Test set-up.....	10
9.2 Initial loading.....	10
9.3 Re-loading.....	11
10 Calculation of G_{IC}	11
10.1 Interpretation of test results.....	11
10.2 Data reduction.....	12
10.2.1 General.....	12
10.2.2 Method A: Corrected beam theory (CBT).....	12
10.2.3 Method B: Modified compliance calibration (MCC).....	14
10.3 Data sheets, data plots and statistical calculation.....	14
11 Precision	18
12 Test report	19
Annex A (normative) Preparation and bonding of the load blocks or piano hinges	21
Annex B (informative) Recommendations for testing	22
Annex C (informative) Recommended test result sheet	25
Annex D (informative) DCB test with flat insert hinge	28
Bibliography	32

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 13, *Composites and reinforcement fibres*.

This second edition cancels and replaces the first edition (ISO 15024:2001), which has been technically revised.

The main changes are as follows:

- a new double cantilever beam (DCB) has been added [[Figure 1 c](#)].

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
