Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test methods	2
4.1 General.....	2
4.2 Sampling.....	2
4.3 Temperature cycling test.....	2
4.3.1 General.....	2
4.3.2 Procedure.....	2
4.4 Rotating shock bin test.....	3
4.4.1 General.....	3
4.4.2 Apparatus.....	3
4.4.3 Procedure.....	3
4.4.4 Evaluation.....	3
4.5 Tensile strength of seams.....	4
4.6 Fuel resistance test.....	4
4.7 Buoyancy test.....	4
4.7.1 Principle.....	4
4.7.2 Apparatus.....	4
4.7.3 Procedure.....	4
4.7.4 Results.....	4
4.8 Suit strength test.....	5
4.8.1 Principle.....	5
4.8.2 Apparatus.....	5
4.8.3 Procedure.....	5
4.8.4 Results.....	6
4.9 Lifting loop test.....	6
4.9.1 Procedure.....	6
4.9.2 Results.....	6
4.10 Flammability test.....	7
4.10.1 Principle.....	7
4.10.2 Apparatus.....	7
4.10.3 Sampling.....	7
4.10.4 Procedure.....	7
4.10.5 Evaluation.....	8
4.11 Cleaning.....	8
4.12 Human test subjects.....	8
4.12.1 Instruction and selection.....	8
4.12.2 Number and sizes of human test subjects.....	8
4.12.3 Gender of human test subjects.....	9
4.12.4 Fitness of human test subjects.....	9
4.12.5 Dress of human test subjects.....	9
4.12.6 Pass/fail criteria.....	9
4.13 Water ingress measurement.....	10
4.13.1 Water ingress measurement for jumping.....	10
4.13.2 Water ingress measurement for swimming.....	10
4.14 Thermal test.....	11
4.14.1 General.....	11
4.14.2 Using a thermal manikin.....	11
4.14.3 Using human test subjects.....	14
4.15 Ergonomic performance testing.....	16
4.15.1 General.....	16
4.15.2 Donning.....	17

4.15.5	Dexterity and mobility.....	19
4.16	In-water performance and field of vision tests.....	19
4.16.1	Jump test.....	19
4.16.2	Secondary donning.....	20
4.16.3	Turning test.....	20
4.16.4	Conspicuity.....	20
4.16.5	Field of vision.....	20
4.16.6	Swim and boarding test.....	21
4.17	Helicopter transit suits.....	21
4.17.1	Helicopter escape.....	21
4.17.2	Buoyancy measurement.....	21
Annex A	(informative) Test results — Uncertainty of measurement.....	23
Annex B	(normative) Test protocol and checklist for thermal manikin testing.....	24
Annex C	(normative) Thermal manikin — Means of circulated water.....	31
Annex D	(normative) Correlation of thermal manikin systems.....	32
Annex E	(informative) Thermal insulation identification for suit material — Test methods.....	34
Annex F	(informative) Medical fitness assessment for human thermal testing in cold water.....	41
Bibliography	42

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 188, *Small craft*, Subcommittee SC 1, *Personal safety equipment*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 162, *Protective clothing including hand and arm protection and lifejackets*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 15027-3:2012), which has been technically revised.

The main changes are as follows:

- the terms and definitions have been revised;
- in [Clause 4](#), the order of testing has been changed and clarified;
- in [4.3](#), a temperature and cycling test procedure for suits stored in sealed storage bags has been added;
- in [4.5](#), a test for tensile strength of seams has been added;
- in [4.7](#), a buoyancy test has been added;
- in [4.8](#), a suit strength test has been added;
- in [4.9](#), a lifting loop test has been added;
- in [4.12.2](#), the number and sizes of human test subjects have been revised;
- in [4.14.2](#), the use of a thermal manikin has been revised;
- [Annex B](#) “Test protocol and checklist for thermal manikin testing” has been added;
- [Annex C](#) “Thermal manikin — Means of circulated water” has been added;
- [Annex D](#) “Correlation of thermal manikin systems” has been added;
- [Annex E](#) “Thermal insulation identification for suit material — Test methods” has been added;
