Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols	4
5 Airflow setting	7
5.1 General	7
5.2 Airflow setting for ducted indoor units	7
5.3 ESP for rating	8
5.4 Airflow setting for non-ducted indoor units measured by air-enthalpy method	10
5.5 Outdoor airflow	10
5.6 Unit supplied without indoor fan	10
6 Cooling tests	10
6.1 Cooling capacity test	10
6.2 Maximum cooling performance test	13
6.3 Minimum cooling test	14
6.4 Freeze-up drip test (applies to non-ducted multi-splits)	15
6.5 Condensate control test and enclosure sweat test	16
7 Heating tests	18
7.1 Heating capacity tests	18
7.2 Maximum heating performance test	23
7.3 Minimum heating performance test	24
7.4 Automatic defrost test	25
8 Heat recovery test	26
8.1 Heat recovery capacity ratings	26
9 Test methods and uncertainties of measurement	26
9.1 Test methods	26
9.2 Uncertainty of measurement	27
9.3 Test tolerances for the capacity tests	28
9.4 Test tolerances for performance tests	29
10 Test results	29
10.1 Capacity calculations	29
10.2 Data to be recorded	31
10.3 Test report	33
11 Marking provisions	34
11.1 Nameplate requirements	34
11.2 Nameplate information	34
11.3 Additional information	34
12 Publication of ratings	34
12.1 Standard ratings	34
12.2 Other ratings	34
Annex A (normative) Airflow settings for ducted units	35
Annex B (normative) Test requirements	39
Annex C (informative) Airflow measurement	45

Annex D (normative) Calorimeter test method	51
Annex E (normative) Indoor air enthalpy test method	60
Annex F (informative) Part-load capacity tests and determination of energy efficiency ratios and coefficients of performance	66
Annex G (informative) Individual indoor unit capacity tests	67
Annex H (normative) Heat recovery test method	69
Annex I (informative) Compressor calibration test method	70
Annex J (informative) Refrigerant enthalpy test method	73
Annex K (informative) Outdoor air enthalpy test method	75
Annex L (informative) Indoor calorimeter confirmative test method	78
Annex M (informative) Outdoor calorimeter confirmative test method	80
Annex N (informative) Balanced-type calorimeter confirmative test method	82
Annex O (informative) Cooling condensate measurements	83
Annex P (normative) Supplemental requirements when rating fan-less (coil only) type units	84
Annex Q (informative) Pictorial examples of the heating capacity test procedures given in 7.1	87
Bibliography	94

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 15042 was prepared by Technical Committee ISO/TC 86, *Refrigeration and air-conditioning*, Subcommittee SC 6, *Testing and rating of air-conditioners and heat pumps*.
