

ISO 15222

**Truck and bus tyres — Method
for measuring relative wet grip
performance — Loaded new tyres**

*Pneumatiques pour camions et autobus — Méthode de mesure
de l'adhérence relative sur revêtement mouillé — Pneumatiques
neufs en charge*

**Third edition
2025-12**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Methods for measuring wet grip	4
5 General test conditions	4
5.1 Track characteristics.....	4
5.1.1 General.....	4
5.1.2 Standard reference test tyre method using SRTT16.....	5
5.1.3 Standard reference test tyre method using SRTT16C, SRTT19.5, SRTT22.5, SRTT19.5 siped, SRTT22.5 siped.....	5
5.2 Wetting conditions.....	6
5.3 Atmospheric conditions.....	6
5.4 Reference tyre.....	6
6 Measurement of tyre wet grip on a standard vehicle	6
6.1 Principles.....	6
6.2 Equipment.....	7
6.2.1 Vehicle.....	7
6.2.2 Measuring equipment.....	7
6.3 Conditioning of the test track.....	7
6.4 Measurement requirements for test speed.....	7
6.5 Tyres and rims.....	7
6.5.1 Vehicle equipment.....	7
6.5.2 Tyre preparation and break-in.....	8
6.5.3 Tyre load.....	8
6.5.4 Tyre inflation pressure.....	8
6.6 Procedures.....	9
6.7 Processing of measurement results.....	9
6.7.1 Calculation of the braking force coefficient.....	9
6.7.2 Validation of results.....	10
6.7.3 Calculation of the adjusted braking force coefficients of the reference tyre.....	10
6.7.4 Calculation of the relative wet grip index of the tyre.....	11
6.8 Wet grip performance comparison between a candidate tyre and a reference tyre using a control tyre.....	12
6.8.1 General.....	12
6.8.2 Principle of the approach.....	12
6.8.3 Selection of a set of tyres as a control tyre set.....	12
6.8.4 Storage and preservation of control tyres.....	12
6.8.5 Replacement of control tyres.....	12
7 Test method using a trailer or a tyre test vehicle	12
7.1 Principle.....	12
7.2 Apparatus.....	13
7.3 Instrumentation.....	13
7.3.1 General.....	13
7.3.2 General requirements for measurement system.....	14
7.4 Selection and preparation of test tyres.....	14
7.5 Preparation of the apparatus and the test track.....	15
7.5.1 Towed trailer.....	15
7.5.2 Tyre test vehicle.....	15
7.5.3 Instrumentation and equipment.....	15
7.5.4 Conditioning of the track.....	16
7.6 General test conditions.....	16
7.7 Procedure.....	16

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 31, *Tyres, rims and valves*.

This third edition cancels and replaces the second edition (ISO 15222:2021), which has been technically revised.

The main changes are as follows:

- addition of new reference tyres in Clauses [5.4](#), [6.7.4](#), [7.8.3](#), and [Annex A](#);
- revision of the track characterization method in Clause [5.1](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
