Second edition
2013-12-01

Non-destructive testing — Equipment for eddy current examination —

Part 1: Instrument characteristics and verification

*Essais non destructifs — Appareillage pour examen par courants
de Foucault —*

Partie 1: Caractéristiques de l'appareil et vérifications

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Eddy current instrument characteristics	1
4.1 General characteristics	1
4.2 Electrical characteristics	2
5 Verification	7
5.1 General	7
5.2 Levels of verification	7
5.3 Verification procedure	8
5.4 Corrective actions	8
6 Measurement of electrical characteristics of instrument	8
6.1 Measuring requirements	8
6.2 Generator unit	9
6.3 Input stage characteristics	12
6.4 Signal processing	14
6.5 Output	23
6.6 Digitisation	23
Annex A (informative) Principle of frequency beat method	24
Annex B (informative) Method of measurement of linearity range between output and input	26
Annex C (normative) Alternative measurement of the input impedance	27

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 135, *Non-destructive Testing*, Subcommittee SC 4, *Eddy current methods*.

This second edition cancels and replaces the first edition (ISO 15548-1:2008), of which it constitutes a minor revision. It also incorporates the Correction ISO 15548-1:2008/Cor 1:2010.

ISO 15548 consists of the following parts, under the general title *Non-destructive testing — Equipment for eddy current examination*:

- *Part 1: Instrument characteristics and verification*
- *Part 2: Probe characteristics and verification*
- *Part 3: System characteristics and verification*
