First edition
1998-05-01

Leather — Tests for colour fastness — Colour fastness to mild washing

*Cuir — Essais de solidité des teintures — Solidité des teintures au lavage
doux*

Reference number
ISO 15703:1998(E)
IULTCS/IUF 423

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 15703 was prepared by the Fastness Tests Commission of the International Union of Leather Technologists and Chemists Societies (IUF Commission, IULTCS). It is based on IUF 423 published in *J. Soc. Leather Tech. Chem.*, **76**, pp. 179-180 (1992), and declared an official method of the IULTCS in October 1993.

Annexes A and B of this International Standard are for information only.
