Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols and their designations	3
5 Principle of test	4
5.1 General	4
5.2 Determination of coefficients of friction	4
5.3 Determination of torque coefficient K (K-factor)	5
5.4 Determination of ratio T/F	5
6 Apparatus	5
6.1 Testing machine	5
6.2 Test fixture	5
7 Test parts	6
7.1 General	6
7.2 Test-bearing plates or test washers	7
7.3 Test nuts for testing bolts, screws and studs	8
7.4 Test bolts or test screws for testing nuts	8
8 Testing under standard conditions	9
9 Testing under specific conditions	9
10 Evaluation of results	9
10.1 Determination of torque coefficient K	9
10.2 Determination of coefficient of total friction μ_{tot}	10
10.3 Determination of coefficient of friction between threads μ_{th}	10
10.4 Determination of coefficient of friction between bearing surfaces μ_{b}	11
10.5 Determination of yield clamp force F_{y}	11
10.6 Determination of yield tightening torque T_{y}	11
10.7 Determination of ultimate clamp force F_{u}	11
10.8 Determination of ultimate tightening torque T_{u}	11
11 Test report	11
11.1 General	11
11.2 Description of fasteners to be tested	12
11.3 Description of test parts	13
11.4 Testing machine	13
11.5 Test fixture	14
11.6 Environmental conditions	14
11.7 Specific conditions	14
11.8 Test results	14
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 16047 was prepared by Technical Committee ISO/TC 2, *Fasteners*, Subcommittee SC 1, *Mechanical properties of fasteners*.
