Second edition
2014-05-15

Stainless steels for general purposes —

Part 2: Corrosion-resistant semi-finished products, bars, rods and sections

Aciers inoxydables pour usage général —

Partie 2: Demi-produits, barres, fils machine et profils en acier résistant à la corrosion

Reference number
ISO 16143-2:2014(E)

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Designation	2
5 Information to be supplied by the purchaser	2
6 Classification of grades	3
7 Requirements	3
7.1 Manufacturing process.....	3
7.2 Delivery condition.....	3
7.3 Chemical composition.....	3
7.4 Susceptibility to intergranular corrosion.....	4
7.5 Mechanical properties.....	4
7.6 Surface quality.....	4
7.7 Internal soundness.....	5
7.8 Dimensions, tolerances on dimensions, and shape.....	5
8 Inspection, testing, and conformance of products	5
8.1 General.....	5
8.2 Inspection and testing procedures and types of inspection documents.....	5
8.3 Specific inspection and testing.....	6
8.4 Test methods.....	6
8.5 Retests.....	7
9 Marking	7
Annex A (informative) Guidelines for further treatment (including heat treatment) in fabrication	29
Annex B (informative) Designations of the steels given in Table 2 and of comparable grades covered in ASTM, EN, JIS, and GB Standards	34
Annex C (informative) Applicable dimensional standards	37
Bibliography	38

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 17, *Steel*, Subcommittee SC 4, *Heat treatable and alloy steels*.

This second edition cancels and replaces the first edition (ISO 16143-2:2004), which has been technically revised.

ISO 16143 consists of the following parts, under the general title *Stainless steels for general purposes*:

- *Part 1: Corrosion-resistant flat products*
- *Part 2: Corrosion-resistant semi-finished products, bars, rods and sections*
- *Part 3: Wire*
