Air-cooled air conditioners and air-to-air heat pumps — Testing and calculating methods for seasonal performance factors —

Part 1: Cooling seasonal performance factor

Climatiseurs à condenseur à air et pompes à chaleur air/air — Essais et méthodes de calcul des coefficients de performance saisonniers —

Partie 1: Coefficient de performance saisonnier de refroidissement (COPSR)

5 Tests	5
5.1 General.....	5
5.2 Test conditions.....	5
5.3 Test methods.....	6
6 Calculations	7
6.1 Cooling seasonal performance factor (CSPF) and total cooling seasonal performance factor (TCSPF).....	7
6.2 Defined cooling load.....	7
6.3 Outdoor temperature bin distribution for cooling.....	7
6.4 Cooling seasonal characteristics of fixed capacity units.....	8
6.5 Cooling seasonal characteristics of two-stage capacity units.....	9
6.6 Cooling seasonal characteristics of multi-stage capacity units.....	10
6.7 Cooling seasonal characteristics of variable capacity units.....	11
7 Test report	13
Annex A (informative) Figures	15
Annex B (informative) Calculation of total cooling seasonal performance factor (TCSPF)	19
Annex C (normative) Testing and calculation method for degradation coefficient of cyclic operation	21
Annex D (informative) Calculating method for seasonal performance factor when setting a specific cooling load	24
Annex E (informative) Calculating method for temperature when defined load line crosses each capacity line	25

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users of this document and does not constitute an endorsement. Equivalent products can be used if they can be shown to lead to the same results.

The committee responsible for this document is ISO/TC 86, *Refrigeration and air-conditioning*, Subcommittee SC 6, *Testing and rating of air-conditioners and heat pumps*.

The parts of ISO 16358 are given below:

- *Part 1: Cooling seasonal performance factor*
- *Part 2: Heating seasonal performance factor*
- *Part 3: Annual performance factor*
