## Contents

	Page
<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>2</b>
<b>4 General considerations for sampling slurries</b> .....	<b>2</b>
4.1 Basic requirements.....	2
4.2 Sampling errors.....	3
4.3 Establishing a sampling scheme.....	4
<b>5 Fundamentals of sampling and sample preparation</b> .....	<b>6</b>
5.1 Minimization of bias.....	6
5.2 Volume of increment for falling stream samplers to avoid bias.....	7
5.3 Volume of increment for manual sampling to avoid bias.....	8
5.4 Overall precision.....	9
5.5 Quality variation.....	10
5.6 Sampling precision and number of primary increments.....	11
5.7 Precision of sample preparation and overall precision.....	12
<b>6 Minimum mass of solids in gross and partial samples</b> .....	<b>12</b>
6.1 General.....	12
6.2 Minimum mass of solids in gross samples.....	12
6.3 Minimum mass of solids in partial samples.....	13
<b>7 Time-basis sampling</b> .....	<b>13</b>
7.1 General.....	13
7.2 Sampling interval.....	13
7.3 Cutters.....	13
7.4 Taking of increments.....	14
7.5 Constitution of gross or partial samples.....	14
7.6 Division of increments and partial samples.....	14
7.7 Division of gross samples.....	14
7.8 Number of cuts for division.....	14
<b>8 Stratified random sampling within fixed time intervals</b> .....	<b>14</b>
<b>9 Mechanical sampling from moving streams</b> .....	<b>15</b>
9.1 General.....	15
9.2 Design of the sampling system.....	15
9.3 Slurry sample cutters.....	17
9.4 Mass of solids in increments.....	17
9.5 Number of primary increments.....	18
9.6 Routine checking.....	18
<b>10 Manual sampling from moving streams</b> .....	<b>18</b>
10.1 General.....	18
10.2 Choosing the sampling location.....	18
10.3 Sampling implements.....	18
10.4 Volume of increments.....	19
10.5 Number of primary increments.....	19
10.6 Sampling procedures.....	19
<b>11 Sampling of stationary slurries</b> .....	<b>20</b>
<b>12 Sample preparation procedures</b> .....	<b>20</b>
12.1 General.....	20
12.2 Grinding mills.....	20
12.3 Sample division.....	20
12.4 Chemical analysis samples.....	20

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 102, *Iron ore and direct reduced iron*, Subcommittee SC 1, *Sampling*.
