	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Tests and requirements	1
4.1 Vibration	1
4.2 Mechanical shock	27
4.3 Free fall	29
4.4 Surface strength/scratch and abrasion resistance	29
4.5 Gravel bombardment	29
5 Code letters for mechanical loads	29
6 Documentation	30
Annex A (informative) Guideline for the development of test profiles for vibration tests	32
Annex B (informative) Recommended mechanical requirements for equipment depending on the mounting location	44
Bibliography	46

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 16750-3 was prepared by Technical Committee ISO/TC 22, *Road vehicle*, Subcommittee SC 3, *Electrical and electronical equipment*.

This third edition cancels and replaces the second edition (ISO 16750-3:2007), which has been technically revised.

ISO 16750 consists of the following parts, under the general title *Road vehicles — Environmental conditions and testing for electrical and electronic equipment*:

- *Part 1: General*
- *Part 2: Electrical loads*
- *Part 3: Mechanical loads*
- *Part 4: Climatic loads*
- *Part 5: Chemical loads*
