Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Description of machinery family	4
5 Sound power determination	5
5.1 General.....	5
5.2 Guidelines for the selection of the most appropriate basic standard.....	5
5.3 Additional requirements.....	5
6 Installation and mounting conditions	8
6.1 Mounting of the machine.....	8
6.2 Auxiliary equipment and loaded machines.....	9
7 Operating conditions	9
7.1 General.....	9
7.2 Load.....	10
7.3 Variable speed devices.....	10
8 Measurement uncertainty	10
9 Determination of the emission sound pressure level	12
9.1 General.....	12
9.2 Selection of the relevant work station.....	12
9.3 Selection of basic standard to be used.....	12
9.4 Measurement uncertainty.....	12
10 Indication of noise emission quantities determined according to this International Standard	12
11 Information to be recorded	13
12 Information to be reported	13
13 Declaration and verification of noise emission values (if required)	13
Annex A (informative) Overview of standards for the determination of sound power levels of machines and equipment	15
Annex B (informative) Example of a dual-number declaration for rotating electrical machines	18
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2, www.iso.org/directives.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received, www.iso.org/patents.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 43, *Acoustics*, Subcommittee SC 1, *Noise*.

This second edition cancels and replaces the first edition (ISO 1680:1999), which has been technically revised.
