

**ISO
17234-1**

**IULTCS
IUC 20-1**

**Leather — Chemical tests for
the determination of certain azo
colourants in dyed leathers —**

**Part 1:
Determination of certain aromatic
amines derived from azo colourants**

*Cuir — Essais chimiques pour le dosage de certains colorants
azoïques dans les cuirs teints —*

*Partie 1: Dosage de certaines amines aromatiques dérivées des
colorants azoïques*

**Fourth edition
2024-12**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General	1
5 Principle	3
6 Safety precautions	3
7 Apparatus	3
8 Reagents	4
9 Sampling and preparation of samples	5
10 Procedure	5
10.1 Degreasing.....	5
10.2 Reductive cleavage.....	5
10.3 Liquid-liquid extraction.....	5
10.4 Check of the analytical system.....	6
11 Chromatographic analyses	6
12 Calibration	6
13 Evaluation	6
13.1 Calculation of amine in the sample.....	6
13.2 Reliability of the method.....	7
14 Test report	7
Annex A (informative) Chromatographic analyses	8
Annex B (informative) Reliability of the method	11
Annex C (informative) Assessment guide — Interpretation of analytical results	12
Annex D (informative) Procedure for liquid/liquid extraction without diatomaceous earth	18
Annex E (normative) Colourants — Method for the determination of certain aromatic amines	21
Annex F (normative) Leather and colourants — Method for the determination of free aromatic amines	22
Bibliography	25

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

IULTCS, originally formed in 1897, is a world-wide organization of professional leather societies to further the advancement of leather science and technology. IULTCS has three Commissions, which are responsible for establishing international methods for the sampling and testing of leather. ISO recognizes IULTCS as an international standardizing body for the preparation of test methods for leather.

This document was prepared by the Chemical Test Commission of the International Union of Leather Technologists and Chemists Societies (IUC Commission, IULTCS) in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 289, *Leather*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

It is based on IUC 20 published in J. Soc. Leather Tech. Chem., **86**, pp. 299-305, 2002, and declared an official method of the IULTCS in June 2003.

This fourth edition cancels and replaces the third edition (ISO 17234-1:2020), which has been technically revised.

The main changes are as follows:

- normative [Annexes E](#) and [F](#) have been added.

A list of all parts in the ISO 17234 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
