

ISO 17268-1

**Gaseous hydrogen land vehicle
refuelling connection devices —**

Part 1:
**Flow capacities up to and
including 120 g/s**

*Dispositifs de raccordement pour le ravitaillement des véhicules
terrestres en hydrogène gazeux —*

Partie 1: Capacités de débit jusqu'à 120 g/s inclus

**First edition
2025-08**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General construction requirements	4
5 Nozzles	7
6 Receptacles	9
7 Design verification test procedures	10
7.1 General requirements.....	10
7.2 Test conditions.....	10
7.3 Nozzle tests.....	10
7.4 Receptacle tests.....	10
7.5 User — Machine interface test.....	10
7.6 Dropping test.....	11
7.7 Leakage at room temperature test.....	11
7.8 Valve operating handle test.....	12
7.9 Receptacle vibration resistance test.....	12
7.10 Abnormal loads test.....	12
7.11 Low and high temperatures test.....	13
7.11.1 Purpose.....	13
7.11.2 General.....	13
7.11.3 Leakage tests.....	13
7.12 Operation tests.....	14
7.13 Durability and maintainability test.....	14
7.13.1 Purpose.....	14
7.13.2 Nozzle durability test.....	14
7.13.3 Receptacle check valve durability test.....	15
7.13.4 Receptacle durability test.....	15
7.13.5 Connector durability test.....	16
7.14 Sealing material aging test.....	16
7.14.1 Purpose.....	16
7.14.2 Oxygen aging test procedure.....	16
7.14.3 Ozone aging test procedure.....	16
7.15 Non-metallic material hydrogen resistance test.....	16
7.16 Electrical resistance test.....	17
7.17 Hydrostatic strength test.....	17
7.18 Corrosion resistance test.....	17
7.18.1 Purpose.....	17
7.18.2 General.....	17
7.18.3 Nozzle test.....	17
7.18.4 Receptacle test.....	17
7.19 Deformation test.....	18
7.20 Contamination test.....	18
7.21 Thermal cycle test.....	18
7.22 Misconnected nozzle test.....	18
7.23 Upward/downward compatibility test.....	20
7.23.1 General.....	20
7.23.2 Upward/downward compatibility test.....	20
7.23.3 Other fuels receptacles incompatibility test.....	20
7.24 Washout test.....	20
7.25 User abuse test.....	21
7.26 Cold gas test.....	21
7.27 Rocking test.....	22

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 197, *Hydrogen technologies*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 268, *Cryogenic vessels and specific hydrogen technologies applications*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This first edition of ISO 17268-1, together with ISO 17268-2, cancels and replaces ISO 17268:2020.

A list of all parts in the ISO 17268 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
