3.1 Terms and definitions.....	1
3.2 Symbols.....	1
4 Requirements	2
4.1 Elements of thread connection.....	2
4.2 Sealing element.....	2
4.3 Geometry of thread profile.....	2
4.4 Physical and mechanical requirements of the thread connection.....	7
5 Testing	8
5.1 Visual inspection.....	8
5.2 Circularity of threads.....	8
5.3 Geometry of male thread connector.....	9
5.4 Geometry of female thread connector.....	12
5.5 Beginning of the effective thread of the male connection.....	16
5.6 Resistance of the connectors to pull forces.....	16
6 Marking and identification	17
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 17420-3 was prepared by Technical Committee ISO/TC 94, *Personal safety — Protective clothing and equipment*, Subcommittee SC 15, *Respiratory protective devices*.

ISO 17420 consists of the following parts, under the general title *Respiratory protective devices — Performance requirements*:

— *Part 3: Thread connection*

The following parts are under preparation:

— *Part 1: Supplied breathable gas devices*

— *Part 2: Filtering devices*
