ISO 17662

**Welding — Calibration, verification
and validation of equipment used
for welding, including ancillary
activities**

*Soudage — Étalonnage, vérification et validation du matériel
utilisé pour le soudage, y compris pour les procédés connexes*

**Third edition
2025-09**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General requirements	3
4.1 General.....	3
4.2 Frequency.....	4
4.3 Requirements.....	4
4.4 Process data.....	5
4.5 Material properties.....	5
5 Process data common to more than one welding/brazing process	5
5.1 Process data common to all welding/brazing processes.....	5
5.2 Requirements specific to several welding/brazing processes.....	7
5.3 Requirements specific to arc welding (group 1).....	7
6 Metal arc welding without gas protection (group 11)	9
7 Plasma arc welding (group 15)	9
8 Resistance welding (groups 21, 22, 23, 24, and 25)	10
9 Gas welding (group 3)	11
10 Friction welding (group 42)	11
11 Laser beam welding (group 52)	12
12 Electron beam welding (group 51)	13
13 Stud welding (group 78)	14
14 Brazing and soldering (group 9)	15
14.1 General.....	15
14.2 Manual and mechanized flame brazing (group 912).....	16
14.3 Induction brazing (group 916).....	16
14.4 Resistance brazing (group 918).....	16
14.5 Furnace brazing in protective atmosphere (group 921).....	17
14.6 Vacuum brazing (group 922).....	18
14.7 Furnace brazing in open atmosphere (group 921).....	19
14.8 Dip-bath brazing (group 923), salt-bath brazing (group 924) and flux-bath brazing (group 925).....	20
14.9 Infrared soldering (group 941).....	20
15 Preheat and/or post weld heat treatment	21
15.1 Preheat.....	21
15.2 Post weld heat treatment.....	21
16 Post weld cleaning	22
17 Flame cutting (group 81) and other ancillary processes	22
Annex A (informative) Details for stud welding	23
Annex B (informative) Acceptance testing of equipment	26
Annex C (informative) Parties involved	27
Bibliography	28

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 10, *Quality management in the field of welding*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 121, *Welding and allied processes*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 17662:2016), which has been technically revised.

The main changes are as follows:

- [Clause 13](#) (Stud welding) technically revised;
- [Clause 14](#) (Brazing) soldering added;
- bibliography updated.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html. Official interpretations of ISO/TC 44 documents, where they exist, are available from this page: <https://committee.iso.org/sites/tc44/home/interpretation.html>.
