<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Requirements</b> .....	<b>2</b>
4.1 Colour.....	2
4.2 Appearance.....	2
4.3 Size, mass and dimensions.....	2
4.4 Tensile Property.....	4
4.4.1 General.....	4
4.4.2 Tensile strength and elongation at break before accelerated ageing.....	4
4.4.3 Tensile strength and elongation at break after accelerated ageing.....	4
4.5 Bursting diameters.....	4
4.6 Ozone resistance.....	5
<b>5 Sampling</b> .....	<b>5</b>
<b>6 Packing, marking, transport and storage</b> .....	<b>6</b>
6.1 Packing.....	6
6.2 Marking.....	6
6.2.1 Paper box.....	6
6.2.2 Container.....	6
6.2.3 Certification of proof.....	6
6.3 Transport and storage.....	7
<b>Annex A (normative) Visual inspection of meteorological balloons</b> .....	<b>8</b>
<b>Annex B (normative) Inflatable inspection of meteorological balloons</b> .....	<b>10</b>
<b>Annex C (normative) Mass measurement</b> .....	<b>13</b>
<b>Annex D (normative) Dimension measurement</b> .....	<b>14</b>
<b>Annex E (normative) Burst test of meteorological balloons</b> .....	<b>17</b>
<b>Annex F (normative) Test method of ozone ageing of meteorological balloons</b> .....	<b>19</b>
<b>Bibliography</b> .....	<b>21</b>

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC4, *Products (other than hoses)*.

This second edition cancels and replaces the first edition (ISO 17717:2017), which has been technically revised.

The main changes compared to the previous edition are as follows:

- in [Table 3](#), the size 10 and its specified values have been added;
- in [Table 6](#), the sizes 10 to 100 and their specified values have been added;
- in [Table B.2](#), the sizes of 10 to 100 and their specified values have been added;
- in [Table 8](#) and [C.3.2](#), the mass range has been changed to size range;
- in [A.2.4](#) and [B.3.1](#), thin cotton gloves without coating on palm for precision work have been added;
- in [E.3](#), the statement has been changed to "the number of samples shall be in accordance with [Table 8](#)".

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
