## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 254, *Safety of amusement rides and amusement devices*.

This second edition cancels and replaces the first edition (ISO 17842-2:2015), which has been technically revised.

The main changes are as follows:

- references to ISO/TS 17929 have been removed;
- the list of terms in [Clause 3](#) has been updated;
- [4.2](#), Standard documentation has been updated;
- [4.3.3.3.1](#), General has been added;
- [4.3.4.1](#), General has been added;
- [4.3.4.4.3](#), Operating control equipment has been updated;
- [4.3.4.4.4](#), Control equipment operated by passengers has been updated;
- [4.3.5.2](#), Daily check and trial run has been updated;
- [4.3.6.1](#), During operating cycle has been updated;
- [4.3.8.3](#), Repairs has been updated;
- [4.3.8.4](#), Modification has been updated;
- [4.6.1.2](#), Inspection process and [4.6.2](#), Reports have been added;
- Table A.1 was updated;
