Non-destructive testing — Acoustic emission testing (AT) — Leak detection by means of acoustic emission

*Essais non destructifs — Contrôle par émission acoustique —
Détection de fuites par émission acoustique*

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Personnel qualification	2
5 Principle of acoustic emission method	2
5.1 The AE phenomenon.....	2
5.2 Influence of different media and different phases.....	3
5.3 Influence of pressure differences.....	4
5.4 Influence of geometry of the leak path.....	4
5.5 Influence of wave propagation.....	4
6 Applications	5
7 Instrumentation	5
7.1 General requirements.....	5
7.2 Sensors.....	5
7.2.1 Typical frequency ranges (band widths).....	5
7.2.2 Mounting method.....	6
7.2.3 Temperature range, wave guide.....	6
7.2.4 Intrinsic safety.....	6
7.2.5 Immersed sensors.....	6
7.2.6 Integral electronics (amplifier, RMS converter, ASL converter, band pass).....	6
7.3 Portable and non-portable AT instruments.....	6
7.4 Single and multichannel AT equipment.....	6
7.4.1 Single-channel systems.....	6
7.4.2 Multi-channel systems.....	6
7.5 Measuring features (RMS, ASL vs. hit or continuous AE vs. burst AE).....	7
7.6 Verification using artificial leak noise sources.....	7
8 Test steps for leak detection	7
8.1 Sensor application.....	7
8.2 Measured features.....	8
8.3 Background noise.....	8
8.3.1 Environmental noise.....	8
8.3.2 Process noise.....	8
8.4 Data acquisition.....	8
9 Location procedures	9
9.1 General considerations.....	9
9.2 Single sensor location based on AE wave attenuation.....	9
9.3 Multi-sensor location based on Δt values (linear, planar).....	9
9.3.1 Threshold level and peak level timing method.....	9
9.3.2 Cross correlation method.....	10
9.4 Wave type and wave mode based location.....	11
10 Data presentation	11
10.1 Numerical data presentation (level-meter).....	11
10.2 Parametric dependent function (e.g. pressure).....	11
10.3 Frequency spectrum.....	12
11 Data interpretation	12
11.1 Leak validation.....	12
11.1.1 On-site (during test) and off-site (post analysis).....	12
11.1.2 Correlation with pressure.....	12
11.1.3 Rejection of false indications.....	12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

ISO 18081 was prepared by the European Committee for Standardization (CEN) Technical Committee CEN/TC 138, *Non-destructive testing*, in collaboration with ISO Technical Committee TC 135, *Non-destructive testing*, Subcommittee SC 9, *Acoustic emission testing*, in accordance with the agreement on technical cooperation between ISO and CEN (Vienna Agreement).
