Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
4.1 Gross calorific value.....	2
4.2 Net calorific value.....	3
5 Reagents	3
6 Apparatus	4
7 Preparation of test sample	7
8 Calorimetric procedure	8
8.1 General.....	8
8.2 Preparing the bomb for measurement.....	10
8.2.1 General procedure.....	10
8.2.2 Using combustion aid.....	10
8.3 Assembling the calorimeter.....	11
8.4 Combustion reaction and temperature measurements.....	11
8.5 Analysis of products of combustion.....	12
8.6 Corrected temperature rise θ	12
8.6.1 Observed temperature rise.....	12
8.6.2 Isoperibol and static-jacket calorimeters.....	12
8.6.3 Adiabatic calorimeters.....	14
8.6.4 Thermometer corrections.....	14
8.7 Reference temperature.....	14
9 Calibration	14
9.1 Principle.....	14
9.2 Calibrant.....	15
9.2.1 Certification conditions.....	15
9.2.2 Calibration conditions.....	15
9.3 Valid working range of the effective heat capacity ϵ	15
9.4 Ancillary contributions.....	16
9.5 Calibration procedure.....	16
9.6 Calculation of effective heat capacity for the individual experiment.....	17
9.6.1 Constant mass-of-calorimeter-water basis.....	17
9.6.2 Constant total-calorimeter-mass basis.....	17
9.7 Precision of the mean value of the effective heat capacity ϵ	18
9.7.1 Constant value of ϵ	18
9.7.2 ϵ as a function of the observed temperature rise.....	19
9.8 Redetermination of the effective heat capacity.....	19
10 Gross calorific value	19
10.1 General.....	19
10.2 Combustion.....	20
10.3 Calculation of gross calorific value.....	20
10.3.1 General.....	20
10.3.2 Constant mass-of-calorimeter-water basis.....	20
10.3.3 Constant total-calorimeter-mass basis.....	22
10.3.4 ϵ as a function of the observed temperature rise.....	23
10.4 Expression of results.....	23
10.5 Calculation to other bases.....	23
11 Performance characteristics	24

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 238, *Solid biofuels*.
