Freight containers — RFID cargo shipment tag system

Conteneurs pour le transport de marchandises — Système d’étiquettes RFID d’expédition de fret
Contents

Foreword ................................................................................................................................. v
Introduction ............................................................................................................................ vi

1 Scope .................................................................................................................................. 1

2 Normative references .......................................................................................................... 1

3 Terms and definitions ........................................................................................................ 1

4 RFID cargo shipment tag system ..................................................................................... 2

4.1 System composition ......................................................................................................... 2

4.2 System operator ............................................................................................................. 2

4.3 System authorization ...................................................................................................... 2

4.4 System functions ........................................................................................................... 2

4.5 System internal data transmission ................................................................................ 3

4.6 System safeguard measures ........................................................................................ 3

5 RFID cargo shipment tag ................................................................................................ 3

5.1 General requirements .................................................................................................... 3

5.2 Tag installation ............................................................................................................. 4

5.3 Data content and format ............................................................................................... 4

5.4 Electronic security guarantee ...................................................................................... 5

5.5 Working environment ................................................................................................... 5

5.6 RF operations .............................................................................................................. 5

6 Reader .............................................................................................................................. 5

6.1 Types ............................................................................................................................ 5

6.2 Functions ...................................................................................................................... 5

6.3 Data interface ............................................................................................................... 5

7 RFID cargo shipment tag system operation .................................................................... 5

7.1 RFID cargo shipment tag system operational conditions ........................................... 5

7.2 RFID cargo shipment tag system operational requirements ....................................... 6

8 Reliability and accuracy of RFID cargo shipment tag system ...................................... 6

9 Tag operation .................................................................................................................. 6

Annex A (normative) Data format for RFID cargo shipment tag ......................................... 7

Bibliography ......................................................................................................................... 9
ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75% of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 18186 was prepared by Technical Committee ISO/TC 104, Freight containers, Subcommittee SC 4, Identification and communication.
