Second edition
2020-06

Textiles — Quantitative chemical analysis —

Part 2: Ternary fibre mixtures

*Textiles — Analyse chimique quantitative —
Partie 2: Mélanges ternaires de fibres*

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Reagents and apparatus	2
6 Conditioning and testing atmosphere	2
7 Sampling and pre-treatment of laboratory test sample	2
8 Procedure	2
9 Calculation and expression of results	2
9.1 General.....	2
9.2 Calculation of percentages of mass of clean dry fibres, disregarding loss of fibre mass during pre-treatment.....	3
9.2.1 Variant 1.....	3
9.2.2 Variant 2.....	4
9.2.3 Variant 3.....	4
9.2.4 Variant 4.....	5
9.3 Calculation of the percentage of each component with adjustment by agreed moisture regains and, where appropriate, by correction factors for losses in mass during pre-treatment operations.....	6
9.4 Calculation of the quantitative analysis by manual separation.....	7
9.4.1 General.....	7
9.4.2 Calculation of the percentage mass of clean dry fibre disregarding loss in fibre mass during pre-treatment.....	7
9.4.3 Calculation of the percentage of each component with adjustment by agreed moisture regain and, where appropriate, by correction factors for losses in mass during pre-treatment.....	8
10 Method of quantitative analysis by a combination of manual separation and chemical means	8
11 Precision of methods	8
12 Test report	8
Annex A (informative) Examples of the calculation of percentages of the components of certain ternary mixtures using some of the variants described in 9.2	9
Annex B (informative) Typical ternary mixtures which can be analysed using methods of analysis of binary mixtures specified in the parts of ISO 1833	12
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 38, *Textiles*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 248, *Textiles and textile products*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 1833-2:2006), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the Introduction has been deleted and relevant information have been moved to [Clause 4](#);
- [Clause 2](#) has been updated;
- the mandatory [Clause 3](#) has been added;
- in [Clause 4](#) (former Clause 3), the explanation of the 4 variants has been added;
- in [9.3](#), additional instruction in case of pre-treatment by extraction with light petroleum and water has been introduced;
- in [Table B.1](#)
 - reference to lyocell (beside viscose, cupro and/or modal) has been added;
 - additional cases: n°36 for Variant 3, n°37 and n°38 for new fibres (elastolefin, melamine), n°39 and n°40 for mixtures with elastane have been introduced;
- the Bibliography has been updated (references to parts of ISO 1833 have been removed).

A list of all parts in the ISO 1833 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
