Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification	2
4.1 Classes	2
4.2 Grades and types	2
5 Materials and construction	3
5.1 Hoses	3
5.2 Hose assemblies	3
6 Dimensions and tolerances	4
6.1 Diameters	4
6.2 Cover thickness	6
6.3 Concentricity	6
7 Physical properties	6
7.1 Fluid resistance of rubber compounds	6
7.2 Performance requirements	7
8 Frequency of testing	10
9 Marking	10
9.1 Hoses	10
9.2 Hose assemblies	10
10 Recommendations for packaging and storage	10
11 Test report	10
Annex A (normative) Type tests and routine tests	11
Annex B (informative) Production acceptance tests	12
Annex C (informative) Recommendations for tolerances on lengths of hose assemblies	13
Annex D (informative) Information to be provided by hose manufacturer	14
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 18752 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Hoses (rubber and plastics)*.

This second edition cancels and replaces the first edition, of which Clause 4.1, Tables 1, 3, 4 and 8, and Annexes C and D have been technically revised.
