Water quality — Determination of the estrogenic potential of water and waste water —

Part 2: Yeast estrogen screen (*A-YES, Arxula adeninivorans*)

*Qualité de l'eau — Détermination du potentiel oestrogène de l'eau et
des eaux résiduaires —*

*Partie 2: Test d'oestrogénicité (*A-YES, Arxula adeninivorans*)*

Foreword	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Principle	4
5 Interferences	4
6 Apparatus and materials	4
7 Reagents, media and test strains	5
8 Sampling and samples	9
8.1 General.....	9
8.2 Bottles and material for sampling.....	9
8.3 Bottles and material pre-cleaning.....	10
8.4 Sampling procedure.....	10
8.5 Transport of samples.....	10
8.6 Pretreatment of samples.....	10
8.7 Storage of samples.....	11
9 Procedure	11
9.1 Test set up.....	11
9.1.1 Preparation of the reference dilution series.....	11
9.1.2 Reactivation of the yeast.....	11
9.1.3 Negative control.....	12
9.1.4 Blank replicate.....	12
9.1.5 Sample dilution.....	12
9.1.6 Field blank.....	13
9.1.7 Plate set up.....	13
9.1.8 Inoculation of the test plate.....	13
9.2 Measurement.....	14
9.2.1 Measurement of the reporter gene activity.....	14
9.2.2 Measurement of the cell density.....	15
9.3 Calculations.....	15
9.3.1 Background correction.....	15
9.3.2 Calculation of the relative growth.....	16
9.3.3 Calculations for assessment of sample blanks.....	17
9.3.4 Calculation of the reporter gene induction.....	19
10 Validity criteria	22
11 Assessment criteria	23
12 Test report	23
13 Verification	23
Annex A (informative) Plate set up	25
Annex B (informative) Lyophilization of <i>Arxula adenivorans</i> cells	26
Annex C (informative) Scheme of test principle	28
Annex D (informative) Test set up for chemicals and extracts	29
Annex E (informative) Preparation of dilution series	30
Annex F (informative) Performance data	31
Annex G (informative) Statistical assessment	41

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 5, *Biological methods*.

A list of all parts in the ISO 19040 series can be found on the ISO website.
