Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Safety requirements and measures for controls	8
4.1 Safety and reliability of control systems.....	8
4.2 Control devices.....	8
4.3 Start.....	8
4.3.1 Direct start.....	8
4.3.2 Start via control power-on.....	8
4.4 Safe stops.....	8
4.4.1 General.....	8
4.4.2 Normal stop.....	8
4.4.3 Operational stop.....	9
4.4.4 Emergency stop.....	9
4.5 Braking function of tools.....	9
4.6 Mode selection.....	9
4.7 Tool speed changing.....	9
4.7.1 Speed changing by shifting the belts on the pulleys.....	9
4.7.2 Speed changing by incremental speed change motor.....	9
4.7.3 Infinitely variable speed frequency inverter.....	9
4.8 Failure of any power supply.....	10
4.9 Manual reset control.....	10
4.10 Standstill detection and monitoring.....	10
4.11 Machine moving parts speed monitoring.....	10
4.12 Time delay.....	10
4.13 Teleservice.....	10
5 Safety requirements and measures for protection against mechanical hazards	10
5.1 Stability.....	10
5.2 Risk of break-up during operation.....	10
5.3 Tool holder and tool design.....	10
5.4 Braking.....	11
5.4.1 Braking of tools.....	11
5.4.2 Maximum run-down time.....	11
5.4.3 Brake release.....	11
5.5 Safeguards.....	11
5.5.1 Fixed guards.....	11
5.5.2 Interlocking moveable guards.....	11
5.5.3 Hold-to-run control.....	11
5.5.4 Two-hand control.....	11
5.5.5 Electro-sensitive protective equipment (ESPE).....	11
5.5.6 Pressure sensitive protecting device (PSPE).....	11
5.5.7 Enabling control.....	11
5.6 Prevention of access to hazardous moving parts.....	12
5.6.1 Guarding of tools.....	12
5.6.2 Safeguarding of shearing zones, crushing zones and drawing-in points.....	13
5.6.3 Guarding of drives.....	13
5.7 Impact hazard.....	13
5.8 Clamping devices.....	13
5.9 Measures against ejection.....	14
5.9.1 General.....	14
5.9.2 Guards material and characteristics.....	14

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 39, *Machine tools*, Subcommittee SC 4, *Woodworking machines*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 142, *Woodworking machines — Safety*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 19085-8:2017), which has been technically revised.

The main changes are as follows:

- the Title has been adapted to better reflect the scope, with its new additions;
- the Scope now specifies that machines are intended for continuous production use;
- surface treating machines and multi blade unit for grooving have been added and covered;
- the machine height capacity has been increased from 550 mm to 700 mm;
- the list of significant hazards has been moved to a new [Annex A](#);
- the structure has been simplified, in particular in [5.6](#);
- [subclause 6.2](#) has been updated and a new full noise test code has been added in [Annex F](#).

A list of all parts in the ISO 19085 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

This is a preview of ISO 19085-8:2024. [Click here to purchase the full version from the ANSI store.](#)

The ISO 19085 series provides technical safety requirements for the design and construction of woodworking machinery, as well as for the content of the relevant instruction handbook. It concerns designers, manufacturers, suppliers and importers of the machines specified in the Scope.

This document is a type-C standard as defined in ISO 12100.

This document is of relevance, in particular, for the following stakeholder groups representing the market players with regard to machinery safety:

- machine manufacturers (small, medium and large enterprises);
- health and safety bodies (e.g. regulators, accident prevention organisations, market surveillance).

Others can be affected by the level of machinery safety achieved with the means of the document by the above-mentioned stakeholder groups:

- machine users/employers (small, medium and large enterprises);
- machine users/employees (e.g. trade unions, organizations for people with special needs);
- service providers, e.g. for maintenance (small, medium and large enterprises);
- consumers (in case of machinery intended for use by consumers).

The above-mentioned stakeholder groups have been given the possibility to participate in the drafting process of this document.

The machinery concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this document.

When requirements of this type-C standard are different from those which are stated in type-A or type-B standards (as defined in ISO 12100), the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

The full set of requirements for a particular type of woodworking machine are those given in the part of ISO 19085 applicable to that type, together with the relevant requirements from ISO 19085-1, to the extent specified in the Scope of the applicable part of ISO 19085.

As far as possible, the safety requirements of parts of the ISO 19085 series refer to the relevant subclauses of ISO 19085-1. Each part includes replacements and additions to the common requirements given in ISO 19085-1.

All parts of the ISO 19085 series have the same structure, so that reference to ISO 19085-1 is made always and only from and to the same subclause number at the last indent level.

[Clauses 1](#) to [3](#) are specific to each part and therefore are distinct from ISO 19085-1:2021, Clauses 1 to 3.

For [Clauses 4](#) to [7](#) and the annexes, each subclause in ISO 19085-1:2021 is cited as either:

- confirmed as a whole;
- confirmed with additions;
- excluded entirely; or
- replaced with specific text.

This is indicated by one of the following possible statements:

- “ISO 19085-1:2021, [subclause/Annex], applies”;

This is a preview of ISO 19085-8:2024. [Click here to purchase the full version from the ANSI store.](#)

- “ISO 19085-1:2021, [subclause/Annex], does not apply.”;
- “ISO 19085-1:2021, [subclause/Annex], is replaced by the following text.” or “ISO 19085-1:2021, [subclause/Annex], is replaced by the following text, subdivided into further specific subclauses.”.

Other subclauses and annexes specific to this document are indicated by the introductory sentence: “Subclause/Annex specific to this document.”.
