

ISO 19232-3

**Non-destructive testing — Image
quality of radiographs —**

Part 3:
Minimum image quality values

*Essais non destructifs — Qualité d'image des radiogrammes —
Partie 3: Indices de qualité d'image minimaux*

**Third edition
2025-07**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Image quality values	2
4.1 Single-wall radiography.....	2
4.2 Double-wall radiography.....	2
5 Arrangement of IQI	3
6 Determination of image quality value	3
7 Reduction of minimum image quality values for gamma radiography	3
8 Requirements for minimum IQI values	4
8.1 General.....	4
8.2 Minimum IQI values for single-wall radiographic techniques; IQI on source side.....	4
8.3 Minimum IQI values for double-wall radiographic techniques; double-image evaluation (DWDI); IQI on source side.....	6
8.4 Minimum IQI values for double-wall radiographic techniques; single-image (DWSI) or double-image (DWDI) evaluation; IQI on detector side.....	8

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 135, *Non-destructive testing*, Subcommittee SC 5, *Radiographic testing*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 138, *Non-destructive testing*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 19232-3:2013), which has been technically revised.

The main changes are as follows:

- title change from: “image quality classes” to “Minimum image quality values”;
- additions to definitions [3.2](#) and [3.3](#);
- renamed [Clause 4](#) “Image quality values”;
- revision of [Clause 7](#) “Reduction of image quality values for gamma radiography”;
- renamed [Clauses 8](#), 9, 10, 11, 12 and 13 for better readability and traceability;
- updated nominal thickness values for IQI values W2 to W5 in [table 1](#);
- updated titles of all tables for better readability and traceability;
- editorial changes.

A list of all parts in the ISO 19232 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
