Foreword	v
1 Scope	1
2 Normative references	1
3 Terms, definitions and symbols	2
3.1 Terms and definitions.....	2
3.2 Symbols.....	3
4 Principle	6
4.1 Gross calorific value.....	6
4.2 Net calorific value.....	7
5 Reagents	7
6 Apparatus	9
7 Preparation of test sample	12
8 Calorimetric procedure	13
8.1 General.....	13
8.2 Preparing the combustion vessel for measurement.....	15
8.2.1 General procedure.....	15
8.2.2 Using a combustion aid.....	15
8.3 Assembling the calorimeter.....	15
8.4 Combustion reaction and temperature measurements.....	16
8.5 Analysis of products of combustion.....	16
8.6 Corrected temperature rise.....	17
8.6.1 Observed temperature rise, $t_f - t_i$	17
8.6.2 Isoperibol and static-jacket calorimeters.....	17
8.6.3 Adiabatic calorimeters.....	18
8.6.4 Thermometer corrections.....	19
8.7 Reference temperature.....	19
9 Calibration	19
9.1 Principle.....	19
9.2 Calibrant.....	19
9.2.1 Certification conditions.....	19
9.2.2 Calibration conditions.....	19
9.3 Valid working range of the effective heat capacity.....	20
9.4 Ancillary contributions.....	20
9.5 Calibration procedure.....	21
9.6 Calculation of effective heat capacity for the individual test.....	21
9.6.1 Constant mass-of-calorimeter-water basis.....	21
9.6.2 Constant total-calorimeter-mass basis.....	22
9.7 Precision of the mean value of the effective heat capacity.....	23
9.7.1 Constant value of ε	23
9.7.2 ε as a function of the observed temperature rise.....	23
9.8 Redetermination of the effective heat capacity.....	23
10 Gross calorific value	24
10.1 General.....	24
10.2 Coal combustions.....	24
10.3 Coke combustions.....	24
10.4 Calculation of gross calorific value.....	25
10.4.1 General.....	25
10.4.2 Constant mass-of-calorimeter-water basis.....	25
10.4.3 Constant total-calorimeter-mass basis.....	26
10.4.4 ε as a function of the observed temperature rise.....	26
10.5 Expression of results.....	27

10.6	Calculation to other bases	27
11	Precision	28
11.1	Repeatability limit	28
11.2	Reproducibility limit	28
12	Calculation of net calorific value	28
12.1	General	28
12.2	Calculations	28
12.2.1	Calculation of net calorific value at constant pressure	28
12.2.2	Calculation of net calorific value at constant volume	30
13	Test report	31
Annex A	(informative) Adiabatic calorimeters	32
Annex B	(informative) Isoperibol and static-jacket calorimeters	36
Annex C	(informative) Automated calorimeters	42
Annex D	(informative) Checklists for the design of combustion tests and their procedures	45
Annex E	(informative) Examples to illustrate some of the calculations used in this document	50
Annex F	(informative) Safe use, maintenance and testing of calorimeter combustion vessels	56
Bibliography	62

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword — Supplementary information](#)

This document was prepared by Technical Committee ISO/TC 27, *Coal and coke*, Subcommittee SC 5, *Methods of analysis*.

This fourth edition cancels and replaces the third edition (ISO 1928:2009), which has been technically revised.

The main changes compared to the previous edition are as follows:

- change the document title within the scope of TC 27,
- editorially update symbols within formulae,
- update references,
- expand on some derivations,
- remove ambiguity around crucible masses, and
- specify the analysis sample.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
