Foreword	iv
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Form of rigging	2
5 Selection method for wire ropes	3
5.1 Safety factor for running rigging.....	3
5.2 Safety factor for standing rigging.....	3
5.3 Minimum breaking strength of wire rope.....	3
5.4 Rigging technical requirement.....	3
6 Extension of rigging	4
6.1 General.....	4
6.2 Original extension.....	4
6.3 Elastic extension.....	4
7 Torsion of the rigging	4
8 Rigging termination	7
8.1 U-bolt and clamp clips.....	7
8.2 Eye splice.....	7
8.3 Wedge socket.....	7
8.4 Connecting efficiency of rigging head.....	7
8.5 Procedures of installation.....	7
9 Installation, maintenance, inspection and discard of rigging	8
9.1 General.....	8
9.2 Installation of the wire rope rigging.....	8
9.3 Maintenance of the rigging.....	8
9.4 Inspection of rigging.....	8
9.4.1 Normal visual inspection.....	8
9.4.2 Periodical inspection.....	8
9.5 Discard of the rigging.....	8
Annex A (normative) Examples for selection of wire ropes	9
Annex B (normative) Example for torsion of the rigging	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 8, *Ships and marine technology*, Subcommittee SC 4, *Outfitting and deck machinery*.
