Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Operating temperature ranges	2
5 Tests and requirements	4
5.1 Tests at constant temperature.....	4
5.1.1 Low-temperature tests.....	4
5.1.2 High-temperature tests.....	4
5.2 Temperature cycling tests.....	5
5.2.1 Temperature cycle with specified change rate.....	5
5.2.2 Rapid change of temperature with specified transition duration.....	8
5.3 Cold water shock tests.....	8
5.3.1 Purpose.....	8
5.3.2 Splash water test.....	8
5.3.3 Submersion test.....	11
5.4 Salt spray tests.....	11
5.4.1 Corrosion test.....	11
5.4.2 Leakage and function test.....	12
5.4.3 Salt spray combined cycle test.....	13
5.5 Humid heat, cyclic test — Dewing test.....	17
5.5.1 Purpose.....	17
5.5.2 Test method.....	17
5.5.3 Requirements.....	19
5.6 Damp heat, steady state test.....	19
5.6.1 Purpose.....	19
5.6.2 Test method.....	19
5.6.3 Requirements.....	19
5.7 Condensation test.....	19
5.7.1 Purpose.....	19
5.7.2 Test method.....	19
5.7.3 Requirement.....	22
5.8 Corrosion test with flow of mixed gas.....	23
5.8.1 Purpose.....	23
5.8.2 Test method.....	23
5.8.3 Requirement.....	23
5.9 Solar radiation test.....	23
5.10 Dust test.....	23
5.10.1 Purpose.....	23
5.10.2 Test method.....	23
5.10.3 Requirement.....	24
5.11 Atmospheric pressure test.....	24
5.11.1 Purpose.....	24
5.11.2 Test method.....	24
5.11.3 Requirements.....	25
6 Code for climatic loads	26
7 Protection against dust and water	26
8 Documentation	26
Annex A (informative) Usual tests and requirements for equipment depending on the mounting location	27

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 32, *Electrical and electronic components and general system aspects*.

A list of all parts in the ISO 19453 series can be found on the ISO website.
