Second edition
2022-03

Plastics — Decorative solid surfacing materials —

Part 3: Determination of properties — Solid surface shapes

Plastiques — Matériaux décoratifs massifs de revêtement de surface —

Partie 3: Détermination des propriétés — Produits mis en forme

	Page
Foreword.....	vi
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	2
4 Cleaning the test specimen surface.....	2
4.1 General.....	2
4.2 Materials.....	2
4.3 Procedure.....	2
5 Surface defects.....	2
5.1 Procedure.....	2
5.2 Method of inspection of surface.....	3
5.3 Performance requirements.....	3
5.4 Test report.....	3
6 Resistance to impact by large-diameter ball.....	3
6.1 Principle.....	3
6.2 Test specimen.....	3
6.3 Procedure.....	3
6.4 Performance requirement.....	4
6.5 Test report.....	4
7 Lightfastness.....	5
7.1 Method A.....	5
7.1.1 Principle.....	5
7.1.2 Apparatus.....	5
7.1.3 Test specimen.....	5
7.1.4 Procedure.....	5
7.1.5 Assessment of specimen and expression of results.....	6
7.1.6 Test report.....	6
7.2 Method B.....	6
7.2.1 Principle.....	6
7.2.2 Materials.....	7
7.2.3 Apparatus.....	7
7.2.4 Standardization of apparatus.....	7
7.2.5 Test specimens.....	7
7.2.6 Procedure.....	7
7.2.7 Expression of results.....	8
7.2.8 Test report.....	8
7.3 Method C (resistance to colour change in light from an enclosed carbon-arc lamp).....	9
7.3.1 Principle.....	9
7.3.2 Apparatus.....	9
7.3.3 Test specimen.....	9
7.3.4 Procedure.....	9
7.3.5 Evaluation and expression of results.....	9
7.3.6 Test report.....	9
8 Stain/chemical-resistance test.....	10
8.1 Method A.....	10
8.1.1 Principle.....	10
8.1.2 Staining agents.....	10
8.1.3 Apparatus and materials.....	10
8.1.4 Test specimens.....	10
8.1.5 Procedures.....	14
8.1.6 Expression of results.....	14
8.1.7 Test report.....	14

13	Hardness	40
14	Ability to be renewed	40
	Bibliography	41

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 11 *Products*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 249, *Plastics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 19712-3:2007), of which it constitutes a minor revision.

The changes compared to the previous edition are as follows:

- the normative references clause has been updated;
- the rate of flow of water has been updated in [Table 6](#) and subclause [12.2.4](#).

A list of all parts in the ISO 19712 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
