Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements	9
4.1 Area measured.....	9
4.2 Measurement sample density.....	9
4.3 Measurement and report of performance.....	9
4.4 Colour presentation of results.....	9
5 Test methods and test devices	9
5.1 Tests.....	9
5.1.1 Accuracy test.....	9
5.1.2 Repeatability test.....	9
5.2 Test surfaces.....	9
5.2.1 Reflection-based and Placido ring corneal topographers.....	9
5.2.2 Luminous surface corneal topographer.....	10
5.2.3 Optical-sectioning corneal topographer.....	10
5.2.4 Specification of test surfaces.....	10
5.2.5 Verification of test surfaces.....	10
5.2.6 Type testing of surfaces.....	10
5.3 Data collection — Test surfaces.....	11
5.4 Analysis of the data.....	11
5.4.1 General.....	11
5.4.2 Structure of the accuracy data set.....	12
5.4.3 Analysis of the paired data sets.....	12
5.4.4 Report of accuracy performance.....	13
6 Accompanying documents	13
7 Marking	13
Annex A (informative) Test surfaces for corneal topographers (CTs)	14
Annex B (informative) Standardized displays for corneal topographers (CTs)	16
Annex C (normative) Calculation of area-weighting values	19
Annex D (normative) Test methods for measuring human corneas	21
Bibliography	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 170, *Ophthalmic optics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 19980:2012), which has been technically revised. The main changes compared to the previous edition are as follows:

- a) normative references were updated;
- b) [5.2.6](#) regarding requirements for test surfaces and requirement for testing of accuracy was changed;
- c) in [5.4.3](#), formulae for data analysis have been updated;
- d) Table 4 was deleted;
- e) document editorially revised.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
