	Page
Foreword	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Nominal leakage rates	3
5 Classification of leaks	3
5.1 Permeation leak.....	3
5.2 Conductance leaks.....	3
5.2.1 Capillary leak.....	3
5.2.2 Aperture leak (orifice).....	4
5.2.3 Compressed powder leak.....	4
6 Calibration by comparison	4
6.1 Methods A, A _s , B and B _s	4
6.2 Applicability of comparison methods.....	4
6.3 Preparation of leaks and apparatus.....	5
6.3.1 Leak detector.....	5
6.3.2 Connection to the leak detector.....	5
6.3.3 Temperature accommodation.....	7
6.4 Measurement.....	7
6.4.1 Set-up.....	7
6.4.2 General measurement sequence.....	7
6.5 Evaluation for methods A, A _s , B and B _s (Comparison).....	8
6.5.1 Determination of leakage rate.....	8
6.5.2 Influence factors to measurement uncertainty.....	9
7 Volumetric calibration	10
7.1 Direct flow (Method C).....	10
7.1.1 General.....	10
7.1.2 Equipment.....	10
7.1.3 Preparation of leaks and apparatus.....	10
7.1.4 Measurement.....	11
7.1.5 Evaluation for Method C (direct flow measurement).....	13
7.2 Leak measurement under water (Method D).....	14
7.2.1 General.....	14
7.2.2 Equipment.....	14
7.2.3 Preparation of leaks and apparatus.....	14
7.2.4 Measurement.....	15
7.2.5 Evaluation for Method D.....	16
7.2.6 Influence factors to measurement uncertainty.....	17
7.3 Calibration by (volumetric) gas meter (Method E).....	17
7.3.1 General.....	17
7.3.2 Equipment.....	18
7.3.3 Preparation of leaks and apparatus.....	18
7.3.4 Measurement.....	18
7.3.5 Evaluation for Method E (gas meter).....	18
7.3.6 Influence factors to measurement uncertainty.....	19
7.4 Calibration by pressure change in a known volume (Method F).....	19
7.4.1 General.....	19
7.4.2 Preparation of leaks and apparatus.....	20
7.4.3 Measurement.....	22
7.4.4 Special situation in vacuum chambers.....	23
7.4.5 Evaluation for Method F (pressure change).....	25
7.4.6 Influence factors to measurement uncertainty.....	25

7.5	Calibration by volume change at constant pressure (Method G)	26
7.5.1	Equipment	26
7.5.2	Preparation of leaks and apparatus	26
7.5.3	Measurement	26
7.5.4	Evaluation for Method G (volume change at constant pressure).....	27
8	General influences	28
9	Report	28
10	Labelling of reference leaks	29
11	Handling of reference leaks	29
11.1	General	29
11.2	Permeation leaks (normally with reservoir fitted the leak outlet).....	29
11.3	Conductance leaks (normally without reservoir).....	29
Annex A (informative) Calculation of leakage rate decrease due to tracer gas depletion in the reservoir		30
Bibliography		32

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 135, *Non-destructive testing*, Subcommittee SC 6, *Leak testing*.
