Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General principles	2
4.1 Principles of PEC testing.....	2
4.2 Characteristics of PEC testing.....	4
4.2.1 Advantages.....	4
4.2.2 Limitations.....	4
4.3 Influence factors.....	5
4.3.1 Coating.....	5
4.3.2 Tested component.....	5
4.3.3 Temperature.....	5
4.3.4 Probe.....	5
4.3.5 Reference zone.....	5
4.3.6 Other factors.....	5
5 Qualification of personnel	6
6 Equipment	6
6.1 Testing system.....	6
6.2 PEC instrument.....	6
6.3 Probe.....	6
6.4 Sensitivity adjustment.....	6
6.5 Test pieces.....	7
6.5.1 Reference blocks.....	7
6.5.2 Spacers.....	8
6.5.3 Metal sheet cover.....	8
6.6 Maintenance and verification of equipment.....	8
7 On-site testing	8
7.1 Preparation of documentation.....	8
7.1.1 Document prerequisites.....	8
7.1.2 Site investigation.....	8
7.1.3 Preparation of testing procedure and record sheets.....	8
7.2 Preparation of the component to be tested.....	9
7.2.1 Surface preparation.....	9
7.2.2 Identification.....	9
7.3 Selection of the references.....	9
7.3.1 Principles.....	9
7.3.2 Reselection of references.....	10
7.3.3 Record of references.....	10
7.4 Performing test.....	10
7.5 Safety.....	10
8 Interpretation and evaluation of test results	10
9 Verification of test results	10
10 Documentation	11
10.1 General.....	11
10.2 General written testing procedure.....	11
10.3 Testing record.....	12
10.4 Testing report.....	12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 135, *Non-destructive testing*, Subcommittee SC 4, *Eddy current methods*.
