

ISO 20846

Petroleum and related products — Determination of sulfur content of automotive fuels — Ultraviolet fluorescence method

*Produits pétroliers et connexes — Détermination de la teneur
en soufre des carburants pour automobiles — Méthode par
fluorescence ultraviolette*

**Fourth edition
2026-07**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	2
5 Reagents and materials	2
5.1 Inert gas	2
5.2 Oxygen	2
5.3 Solvent	2
5.4 Sulfur compounds	2
5.5 Sulfur stock solution	3
5.6 Calibration standards	3
5.7 Quality control samples	3
5.8 Quartz wool	4
6 Apparatus	4
7 Sampling and sample handling	5
8 Apparatus preparation	5
9 Apparatus calibration and verification	6
9.1 Multi-point calibration	6
9.2 Single point calibration	8
9.3 Verification	8
10 Procedure	9
11 Calculation	9
11.1 Using multi-point calibration	9
11.2 Using one-point calibration	10
11.3 Calculation	10
12 Expression of results	11
13 Precision	11
13.1 General	11
13.2 Repeatability, r	11
13.3 Reproducibility, R	11
13.4 Precision estimates	12
14 Test report	12
Bibliography	13

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 28, *Petroleum and related products, fuels and lubricants from natural or synthetic sources*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 19, *Gaseous and liquid fuels, lubricants and related products of petroleum, synthetic and biological origin*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fourth edition cancels and replaces the third edition (ISO 20846:2019), which has been technically revised.

The main changes are as follows:

- the extension of the application scope to include higher blends of biodiesel (FAME) from 50 % up to neat FAME (B100);
- further instructions regarding the (validity of the) multi-point calibration have been implemented.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
