Foreword.....	v
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Principles of sampling slurries	2
4.1 General.....	2
4.2 Sampling errors	3
4.3 Sampling and overall variance	6
5 Sampling schemes	7
6 Minimization of bias and unbiased increment mass.....	13
6.1 Minimizing bias	13
6.2 Volume of increment for falling stream samplers to avoid bias	14
6.3 Volume of increment for manual sampling to avoid bias	14
7 Precision of sampling and determination of increment variance.....	15
7.1 Overall precision.....	15
7.2 Primary increment variance.....	15
7.3 Preparation and testing variance	16
8 Number of sub-lots and number of increments per sub-lot.....	16
9 Minimum mass of solids in lot and sub-lot samples	17
9.1 General.....	17
9.2 Minimum mass of solids in lot samples	17
9.3 Minimum mass of solids in sub-lot samples	17
9.4 Minimum mass of solids in lot and sub-lot samples after size reduction	17
10 Time-basis sampling	18
10.1 General.....	18
10.2 Sampling interval	18
10.3 Cutters	18
10.4 Taking of increments.....	18
10.5 Constitution of lot or sub-lot samples.....	19
10.6 Division of increments and sub-lot samples	19
10.7 Division of lot samples.....	19
10.8 Number of cuts for division	19
11 Stratified random sampling within fixed time intervals	19
12 Mechanical sampling from moving streams.....	20
12.1 General.....	20
12.2 Design of the sampling system.....	20
12.3 Slurry sample cutters	22
12.4 Mass of solids in increments.....	23
12.5 Number of primary increments	23
12.6 Routine checking.....	23
13 Manual sampling from moving streams	23
13.1 General.....	23
13.2 Choosing the sampling location	23
13.3 Sampling implements.....	24
13.4 Mass of solids in increments.....	24
13.5 Number of primary increments	24

13.6	Sampling procedures	25
14	Sampling of stationary slurries	25
15	Sample preparation procedures	25
15.1	General	25
15.2	Reduction mills	25
15.3	Sample division	25
15.4	Chemical analysis samples.....	25
15.5	Physical test samples	26
16	Packing and marking of samples	26
Annex A (informative)	Examples of correct slurry devices.....	27
Annex B (informative)	Examples of incorrect slurry sampling devices.....	30
Annex C (normative)	Manual sampling implements	34
Bibliography	35

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 20904 was prepared by Technical Committee ISO/TC 27, *Solid mineral fuels*, Subcommittee SC 4, *Sampling*.
