Contents

	Page
Foreword	iv
1 Scope	1
2 Normative reference	1
3 Terms and definitions	1
4 Profiles	1
5 Belt designation	2
6 Belt dimensions and tolerances	2
6.1 Belt tooth dimensions — Trapezoidal tooth belts of types ZA and ZB.....	2
6.2 Belt tooth dimensions — Curvilinear tooth belts of types ZH and YH.....	3
6.3 Belt tooth dimensions — Curvilinear tooth belts of types YR and ZR.....	4
6.4 Belt tooth dimensions — Curvilinear tooth belts of types YS and ZS.....	5
6.5 Belt pitch length and tolerances.....	6
6.6 Belt widths and tolerances.....	7
7 Pitch length measurement	7
7.1 Measuring fixture.....	7
7.2 Total measuring force.....	8
7.3 Procedure.....	8
7.4 Dimensions and clearance between measuring pulley and belt, and measuring pulley grooves.....	9
8 Lateral runout measurement	12
8.1 Fixture.....	12
8.1.1 Belt.....	12
8.1.2 Pulleys.....	12
8.2 Measuring device.....	12
8.3 Procedure.....	12
8.4 Results.....	12
9 Pulley types	13
10 Pulley designation	13
11 Pulley groove profile	14
11.1 Pulleys of types ZA and ZB (involute groove profile).....	14
11.2 Pulleys of types ZH and YH.....	15
11.3 Pulleys of types ZR and YR.....	16
11.4 Pulleys of types ZS and YS.....	16
12 Pulley dimensions and tolerances	17
12.1 Pitch tolerances.....	17
12.2 Pulley outside diameter tolerances.....	17
12.3 Minimum pulley width.....	18
12.4 Flange dimensions.....	18
12.5 Other pulley tolerances.....	19
12.5.1 Axial runout.....	19
12.5.2 Radial runout.....	20
12.5.3 Parallelism.....	20
12.5.4 Taper.....	20
13 Quality specification	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 41, *Pulleys and belts (including vee belts)*, Subcommittee SC 4, *Synchronous belt drives*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

This first edition of ISO 21342 cancels and replaces ISO 9010:1997 and ISO 9011:1997.
