## **Styrene-butadiene rubber (SBR) — Determination of the microstructure of solution-polymerized SBR —**

### **Part 2: FTIR with ATR method**

*Caoutchouc styrène-butadiène (SBR) — Détermination de la  
microstructure du SBR polymérisé en solution —*

*Partie 2: Méthode FTIR avec ATR*

<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Principle</b> .....	<b>1</b>
<b>4 Apparatus</b> .....	<b>2</b>
<b>5 Calibration</b> .....	<b>2</b>
5.1 FTIR.....	2
5.2 ATR.....	2
<b>6 Sampling</b> .....	<b>2</b>
<b>7 Procedure for measuring ATR spectrum</b> .....	<b>2</b>
<b>8 Determination of the microstructure of butadiene and the styrene content</b> .....	<b>3</b>
8.1 Measurement of the absorbance for each microstructure component.....	3
8.2 Calculation of microstructures.....	4
8.2.1 General.....	4
8.2.2 Base line correction of each absorbance peak.....	5
8.2.3 Ratio of absorbance.....	5
8.2.4 Second order terms.....	5
8.2.5 Styrene content and microstructures in mass % by regression formulae.....	5
8.2.6 Microstructures in mol %.....	6
<b>9 Precision</b> .....	<b>6</b>
<b>10 Test report</b> .....	<b>6</b>
<b>Annex A (informative) Precision results from an interlaboratory test programme</b> .....	<b>8</b>
<b>Annex B (informative) Acquisition of regression formulae for microstructure</b> .....	<b>10</b>
<b>Annex C (informative) Determination of microstructure by NMR spectrometry</b> .....	<b>12</b>
<b>Bibliography</b> .....	<b>16</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Testing and analysis*.

This first edition of ISO 21561-2 cancels and replaces ISO 21561:2005, which has been technically revised. It also incorporates Amendment ISO 21561:2005/Amd.1:2010.

ISO 21561 consists of the following parts, under the general title *Styrene-butadiene rubber (SBR) — Determination of the microstructure of solution-polymerized SBR*:

- *Part 1: <sup>1</sup>H-NMR and IR with cast-film method*
- *Part 2: FTIR with ATR method*
