First edition
2019-10

Water quality — Determination of perfluoroalkyl and polyfluoroalkyl substances (PFAS) in water — Method using solid phase extraction and liquid chromatography-tandem mass spectrometry (LC-MS/MS)

Qualité de l'eau — Détermination des substances d'alkyle perfluorés et polyfluorés (SPFA) dans l'eau — Méthode par extraction en phase solide et chromatographie liquide et spectrométrie de masse en tandem (CL-SM/SM)

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Interferences	3
5.1 Interferences with sampling and extraction.....	3
5.2 Interferences with LC-MS/MS.....	4
6 Reagents	4
7 Apparatus	7
8 Sampling	8
9 Procedure	8
9.1 Solid-phase extraction.....	8
9.1.1 General.....	8
9.1.2 Sample preparation.....	8
9.1.3 Conditioning of the solid-phase extraction material.....	9
9.1.4 Sample extraction.....	9
9.1.5 Elution.....	9
9.2 LC-MS/MS operating conditions.....	10
9.3 Blank determination.....	12
9.4 Identification.....	12
10 Calibration	13
10.1 General requirements.....	13
10.2 Calibration using an external standard.....	13
10.3 Calibration using an internal standard.....	14
11 Calculation	15
11.1 Use of a calibration curve to determine concentration.....	15
11.2 Calculation of concentration using calibration with external standards.....	15
11.3 Calculation of concentration using calibration with internal standards.....	16
11.4 Treatment of results outside the calibration range.....	16
12 Determination of analyte recovery	16
12.1 Recovery.....	16
12.2 Recovery of internal standards.....	17
13 Expression of results	18
14 Test report	18
Annex A (informative) Examples of suitable sorbents	19
Annex B (informative) Examples of suitable LC columns	20
Annex C (informative) Examples of suitable LC-MS/MS conditions	21
Annex D (normative) Filtration and extraction of suspended matter in the sample	25
Annex E (informative) Examples of chromatographic separation of individual linear and branched PFAS isomers	27
Annex F (informative) Rapid method by direct injection	31
Annex G (informative) Rapid method by online solid phase extraction LC-MS/MS	32
Annex H (informative) Performance data by DIN 38407-42 for selected PFAS	35

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 2, *Physical, chemical and biochemical methods*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
