Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Symbols, subscripts and units.....	2
3.1 Symbols	2
3.2 Subscripts	8
3.3 Units	9
4 Individual cylindrical gears.....	10
4.1 Concepts for an individual gear	10
4.2 Reference surfaces, datum lines and reference quantities.....	12
4.3 Involute helicoids.....	17
4.4 Angular pitch and pitches.....	21
4.5 Diameters of gear teeth	24
4.6 Gear tooth height.....	24
4.7 Tooth thickness, space width.....	25
5 Cylindrical gear pairs	27
5.1 Concepts for a gear pair	27
5.2 Mating quantities	28
5.3 Calculation of the sum of the profile shift coefficients.....	31
5.4 Tooth engagement.....	32
5.5 Backlash	40
5.6 Sliding conditions at the tooth flanks.....	41
6 Tooth flank modifications	44
6.1 Tooth flank modifications which restrict the usable flank	44
6.2 Transverse profile modifications	45
6.3 Flank line (helix) modifications	48
6.4 Flank face modifications	49
6.5 Descriptions of modifications by functions.....	51
7 Geometrical limits.....	52
7.1 Counterpart rack tooth profile	53
7.2 Machining allowance	54
7.3 Deviations in tooth thickness	55
7.4 Generating profile shift, generating profile shift coefficient.....	56
7.5 Generated root diameter	57
7.6 Usable area of the tooth flank, tip and root form diameter	57
7.7 Undercut	59
7.8 Overcut	59
7.9 Minimum tooth thickness at the tip circle of a gear.....	59
Annex A (informative) Calculations related to tooth thickness.....	60
Bibliography	83

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 21771 was prepared by Technical Committee ISO/TC 60, *Gears*, Subcommittee SC 1, *Nomenclature and wormgearing*.

This first edition of ISO 21771 cancels and replaces ISO/TR 4467:1982, of which it constitutes a technical revision.
