## Contents

	Page
<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Principle of measurement</b> .....	<b>2</b>
4.1 Basic principle of all magnetic measurement methods.....	2
4.2 Magnetic pull-off method.....	2
4.3 Magnetic inductive principle.....	3
4.4 Magnetic flux gauge.....	5
<b>5 Factors affecting measurement accuracy</b> .....	<b>6</b>
5.1 Basic influence of the coating thickness.....	6
5.2 Magnetic properties of the base metal.....	6
5.3 Electrical properties of the coating materials.....	7
5.4 Geometry: base metal thickness.....	7
5.5 Edge effect.....	7
5.6 Geometry: surface curvature.....	7
5.7 Surface roughness.....	8
5.8 Cleanliness: lift-off effect.....	8
5.9 Probe pressure.....	8
5.10 Probe tilt.....	8
5.11 Temperature effects.....	9
5.12 External electromagnetic fields.....	9
<b>6 Calibration and adjustment of the instrument</b> .....	<b>9</b>
6.1 General.....	9
6.2 Thickness reference standards.....	9
6.3 Methods of adjustment.....	10
<b>7 Measurement procedure and evaluation</b> .....	<b>10</b>
7.1 General.....	10
7.2 Number of measurements and evaluation.....	11
<b>8 Uncertainty of the results</b> .....	<b>11</b>
8.1 General remarks.....	11
8.2 Uncertainty of the calibration of the instrument.....	12
8.3 Stochastic errors.....	13
8.4 Uncertainties caused by factors summarized in <a href="#">Clause 5</a> .....	13
8.5 Combined uncertainty, expanded uncertainty and final result.....	14
<b>9 Precision</b> .....	<b>14</b>
9.1 General.....	14
9.2 Repeatability ( <i>r</i> ).....	14
9.3 Reproducibility limit ( <i>R</i> ).....	15
<b>10 Test report</b> .....	<b>15</b>
<b>Annex A (informative) Basic principle of all measurement methods</b> .....	<b>17</b>
<b>Annex B (informative) Basic performance requirements for coating thickness gauges which are based on the magnetic method described in this International Standard</b> .....	<b>19</b>
<b>Annex C (informative) Examples of experimental estimation of factors affecting the measurement</b> .....	<b>21</b>
<b>Annex D (informative) Example of uncertainty estimation (see <a href="#">Clause 8</a>)</b> .....	<b>26</b>
<b>Annex E (informative) Basics of the determination of the uncertainty of a measurement of the used measurement method corresponding to ISO/IEC Guide 98-3</b> .....	<b>29</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 107, *Metallic and other inorganic coatings*.

This third edition cancels and replaces the second edition (ISO 2178:1982), which has been technically revised.
