Foreword	vii
Introduction	viii
1 Scope	1
2 Normative references	2
3 Terms and definitions	4
4 List of significant hazards	6
5 Safety requirements	6
5.1 General.....	6
5.2 Risk assessment.....	6
5.2.1 Risk assessments requirements.....	7
5.2.2 As low as reasonably practical.....	8
5.3 Modifications and replacement parts.....	8
5.4 Foreseeable misuse.....	8
5.5 Lifetime.....	8
5.6 Hazard combinations.....	8
5.7 Noise reduction at design stage.....	8
5.8 Mechanical.....	9
5.8.1 Guarding.....	9
5.8.2 Accessibility for maintenance.....	9
5.8.3 Casing design.....	10
5.8.4 Gas turbine compressor surge.....	10
5.8.5 Stability and handling.....	10
5.8.6 Overload of couplings, rotating shafts and gears due to torque.....	11
5.8.7 Vibration.....	11
5.8.8 Mechanical failure caused by corrosion.....	11
5.8.9 Design methods and materials.....	11
5.8.10 Gas turbine temperatures.....	12
5.8.11 Environmental loads.....	12
5.8.12 Assembly features.....	12
5.8.13 Couplings.....	12
5.8.14 Rotor bearings.....	12
5.8.15 Rotating part failure.....	12
5.8.16 Foreign object damage (FOD) screen.....	13
5.8.17 Gearbox.....	13
5.8.18 Starting systems.....	13
5.8.19 Low ambient temperature conditions.....	14
5.9 Gas turbine compressor air inlet system.....	14
5.9.1 General.....	14
5.9.2 Inlet air contamination.....	14
5.9.3 Icing monitoring and prevention.....	14
5.9.4 Implosion protection.....	15
5.9.5 Inlet explosion protection.....	15
5.9.6 Waste disposal through combustion.....	16
5.9.7 Recirculation.....	16
5.9.8 Gas turbine compressor air inlet ducting.....	16
5.10 Fuel systems.....	17
5.10.1 General.....	17
5.10.2 Fuel supply quality and supply conditions.....	17
5.10.3 Pressure (leakage) testing.....	17
5.10.4 Fuel supply heating.....	17
5.10.5 Gas fuel systems.....	17
5.10.6 Liquid fuel systems.....	21

5.10.7	Multi-fuel systems	25
5.10.8	Fuel purging	25
5.10.9	Fuel drainage	26
5.11	Combustion supervision	26
5.11.1	General	26
5.11.2	Requirements for ignition	26
5.11.3	Extinction safety time	27
5.12	Exhaust system	27
5.12.1	Damper controls	27
5.12.2	Flexible joint location	27
5.12.3	Exhaust outlet	27
5.12.4	Explosion protection	27
5.13	Enclosures	28
5.13.1	General	28
5.13.2	Enclosure structure	29
5.13.3	Enclosure fire precautions	29
5.13.4	Explosion prevention and protection — Area classification — Ventilation	29
5.13.5	Gas detection	29
5.13.6	Enclosure purging	30
5.13.7	Flammable mist	30
5.13.8	Access and doors	30
5.13.9	Entrapment	31
5.14	Lighting	31
5.15	Fire precautions	31
5.15.1	General	31
5.15.2	Structural fire risk reduction	31
5.15.3	Flammable fluids mitigation and containment	31
5.15.4	Fire protection	32
5.15.5	Fire detection	32
5.15.6	Fire extinguishing systems	33
5.15.7	Water mist extinguishant	34
5.15.8	Extinguishing system controls	34
5.15.9	Escape	36
5.15.10	Uncontrolled release of media and loss of propellant pressure	36
5.15.11	Vessel thermal relief (burst disc)	36
5.15.12	Propellant vessels	36
5.15.13	Release of extinguishant into gas turbine halls, control rooms, etc.	36
5.16	Hazardous area classification and explosion prevention and protection	37
5.16.1	General	37
5.16.2	Area classification	37
5.16.3	Explosion prevention	37
5.16.4	Avoidance or reduction of effective ignition sources	38
5.16.5	Reduction of explosion effects in an enclosed space	39
5.17	Ventilation	41
5.17.1	General	41
5.17.2	Cooling	41
5.17.3	Heating	41
5.17.4	Hazardous area control	41
5.17.5	Hot surfaces	41
5.17.6	Ventilation inlet location	42
5.17.7	Ventilation inlet filtration	42
5.17.8	Ventilation inlet ducting	42
5.17.9	Ventilation outlet location	42
5.17.10	Ventilation monitoring	42
5.18	Fans	43
5.18.1	Fan guards and structural failure	43
5.18.2	Air blast oil coolers	43
5.18.3	Sparking of fan blades	43

5.19	Flammable gas detection	43
5.19.1	Type / selection principles	43
5.19.2	Location principles	43
5.19.3	Settings	44
5.19.4	Enclosures containing hot surfaces — Screening tool	44
5.19.5	Maintenance and calibration	44
5.20	Control and automatic protection systems	44
5.20.1	General	44
5.20.2	Environmental suitability	45
5.20.3	Ergonomics	45
5.20.4	Failure	45
5.20.5	Calibration	45
5.20.6	Testing	45
5.20.7	Speed control	46
5.20.8	Gas turbine emergency shutdown system	46
5.20.9	Interlocks	47
5.20.10	Cyber security	47
5.21	Electrical	47
5.21.1	Design/Installation	47
5.21.2	Isolation and stored energy	47
5.21.3	Electrostatic energy and bonding	48
5.21.4	Water ingress	48
5.21.5	Lightning	49
5.21.6	Electromagnetic compatibility (EMC)	49
5.21.7	Battery installations	49
5.21.8	Electrical overload	49
5.21.9	Electrical power failure	49
5.22	Drains, vents and bleeds	50
5.22.1	General	50
5.22.2	Vents for flammable gases	50
5.22.3	Toxic and hazardous emissions	50
5.22.4	Gas turbine compressor bleeds	51
5.23	Pressure equipment	51
5.23.1	General	51
5.23.2	Design	51
5.23.3	Hazards	51
5.23.4	Misuse	51
5.23.5	Handling and operation	51
5.23.6	Isolation, draining and venting	52
5.23.7	Fluid injection	52
5.23.8	Assemblies	52
5.23.9	Safety accessories	54
5.23.10	Flexible piping (and metal hoses)	54
5.23.11	External fire	55
5.23.12	Material embrittlement and corrosion	55
5.23.13	Ultra-violet (UV) resistant pipework	55
5.24	Auxiliary systems	55
5.24.1	Lubrication systems	55
5.24.2	Water systems	56
5.24.3	Hydraulic and pneumatic systems	56
5.24.4	Utility air supplies	56
5.25	Installation in a hazardous area	56
5.26	Unenclosed gas turbines in a hall	57
5.27	Decommissioning and disposal	58
6	Compliance verification	58
6.1	Quality assurance	58
6.2	Verification of safety requirements	58

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 192, *Gas turbines*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 399, *Gas Turbines applications*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 21789:2009), which has been technically revised.

The main changes are as follows:

- modified to include required annexes for ISO version;
- general update to simplify text;
- updated all cross references.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document is a type-C standard as stated in ISO 12100:2010.

This document is of relevance, in particular, for the following stakeholder groups representing the market players with regard to machinery safety:

- machine manufacturers (small, medium and large enterprises);
- health and safety bodies (regulators, accident prevention organisations, market surveillance etc.)

Others can be affected by the level of machinery safety achieved with the means of the document by the above-mentioned stakeholder groups:

- machine users/employers (small, medium and large enterprises);
- machine users/employees (e.g. trade unions, organizations for people with special needs);
- service providers, e.g. for maintenance (small, medium and large enterprises);
- consumers (in case of machinery intended for use by consumers).

The above-mentioned stakeholder groups have been given the possibility to participate at the drafting process of this document.

The machinery concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this document.

When requirements of this type-C standard are different from those which are stated in type-A or type-B standards, the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

Where local or national legislation accepts other established codes or standards, or an alternative international or national standard providing equivalent requirements for achieving risk reduction the use of these alternative codes or standards is permissible.

The extent of the applicability of the references may be limited by the context of the text within this document. Where a dated standard is specified this does not preclude the use of later versions provided that the requirements continue to meet the safety issues and identified hazards detailed in this document. Where a reference is made to a specific clause in a standard only the text of that clause and references therein apply.¹⁾

1) References within NOTES are provisions but not normative provisions of this document and are listed in the Bibliography.
