Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Materials, construction and design	4
4.1 Materials.....	4
4.2 Construction.....	4
4.3 Design filling height.....	4
4.4 Recycled materials.....	5
4.5 Electrostatic protective FIBC.....	5
5 Performance	5
5.1 Type-testing.....	5
5.2 Preparation of FIBC for test.....	6
5.2.1 Filling.....	6
5.2.2 Conditioning.....	6
5.3 Test requirements.....	6
5.3.1 Cyclic top lift test(s).....	6
5.3.2 Compression/stacking test.....	6
6 Statement of conformity	7
7 Marking	7
Annex A (normative) Evaluation of the UV resistance	9
Annex B (normative) Cyclic top lift test	11
Annex C (normative) Compression/stacking test	24
Annex D (informative) Guidance on selection and use of FIBCs	25
Annex E (informative) Design of FIBCs	30
Annex F (informative) Optional methods for UV resistance test	34
Bibliography	35

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 122, *Packaging*, Subcommittee SC 3, *Performance requirements and tests for means of packaging, packages and unit loads (as required by ISO/TC 122)*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 261, *Packaging*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 21898:2004), which has been technically revised.

The main changes are as follows:

- in [5.2.1](#), a new note on non-standard filling material has been added;
- a new subclause [4.4](#) on the use of and requirement for recycled materials has been added;
- a new subclause [4.5](#) on electrostatic protective FIBC has been added;
- in [Clause 7](#), the label has been modified;
- [Annex A](#) has been revised;
- [Annex C](#) has been revised;
- a new [Annex F](#), Optional methods for UV resistance test, has been added;
- IEC 61340-4-4 has been incorporated in the document through a series of cross-references.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
