Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification	3
5 Requirements	3
5.1 Reference temperature.....	3
5.2 Lenses used in manufacturing complete spectacles.....	3
5.3 Optical requirements.....	3
5.3.1 General.....	3
5.3.2 Back vertex power.....	4
5.3.3 Direction of the cylinder axis.....	4
5.3.4 Addition power or variation power.....	5
5.3.5 Prism imbalance (relative prism error) for mounted single-vision lenses (excluding position-specific single-vision lenses) and multifocal lenses.....	5
5.3.6 Prism imbalance (relative prism error) for position-specific single-vision lenses and power-variation lenses.....	7
5.4 Requirements for thickness.....	7
5.5 Requirements for positioning.....	8
5.5.1 Multifocal lenses.....	8
5.5.2 Position-specific single-vision lenses and power-variation lenses.....	9
5.6 Orientation requirement for polarizing lenses.....	9
6 Verification methods	9
6.1 General.....	9
6.2 Verification method for back vertex power.....	9
6.3 Verification method for the direction of the cylinder axis.....	9
6.4 Verification method for addition power or variation power.....	10
6.4.1 General.....	10
6.4.2 Method for verification of addition power for multifocal lenses.....	10
6.4.3 Method for verification of variation power (including addition power) for power-variation lenses.....	10
6.5 Verification method for position and tilt.....	11
6.6 Verification method for prism imbalance (relative prism error) for mounted single-vision lenses (excluding position-specific single-vision lenses) and multifocal lenses.....	11
6.7 Verification method for planes of transmission of polarizing lenses.....	11
6.7.1 General.....	11
6.7.2 Apparatus.....	11
6.7.3 Procedure.....	12
6.8 Inspection method for material and surface quality.....	12
7 Marking for position-specific single-vision lenses and power-variation lenses	12
7.1 Permanent marking.....	12
7.2 Optional non-permanent marking.....	13
8 Recommendations on mounting	13
9 Identification	13
10 Reference to this document	13
Annex A (informative) Material and surface quality	14
Annex B (informative) Recommendations on mounting	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

This second edition cancels and replaces the first edition (ISO 21987:2009), which has been technically revised.
