Third edition
2016-02-15

Soil quality — Gas chromatographic determination of volatile aromatic and halogenated hydrocarbons and selected ethers — Static headspace method

Qualité du sol — Dosage des hydrocarbures aromatiques et halogénés volatils et de certains éthers par chromatographie en phase gazeuse — Méthode par espace de tête statique

Reference number

Foreword	iv
1 Scope	1
2 Normative references	1
3 Principle	2
4 Reagents	2
5 Apparatus	6
6 Sampling, preservation, and sample pretreatment	7
6.1 General	7
6.2 Sampling using vials pre-filled with methanol	7
6.3 Sampling using coring tube method	8
7 Procedure	8
7.1 Blank determination	8
7.2 Extraction	8
7.3 Head-space analysis	8
7.4 Gas chromatographic analysis	9
7.4.1 General	9
7.4.2 Calibration	10
7.4.3 Measurement	11
8 Calculation	11
8.1 Calculation of the concentration of a volatile compound in the water sample	11
8.2 Calculation of the concentration of a volatile compound in the soil sample	12
9 Expression of results	12
10 Precision	12
11 Test report	12
Annex A (informative) Relative retention times with respect to ethylbenzene-D10 of volatile aromatic hydrocarbons and volatile halogenated hydrocarbons — Examples of suitable target and qualifier ions	13
Annex B (normative) Check on internal standards	15
Annex C (informative) Validation (general)	16
Annex D (informative) Performance characteristics	19
Bibliography	21

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 190, *Soil quality*, Subcommittee SC 3, *Chemical methods and soil characteristics*.

This third edition cancels and replaces the second edition (ISO 22155:2011), which has been technically revised.
